Middleburg FL 32068

Cell: 818-641-7572

Assadsaadat786@gmail.com

HIGHLIGHTS:

- Over **12+** years of Solution Architect, System Design & Analysis, and Product Management
- Extensive knowledge of Fixed Income, financial statistics, and analysis and modeling.
- Lead Data Science and management projects
- Fixed income derivatives support and operations
- End-to-end expertise in enterprise data architecture, database design, reporting, and system interoperability

PROFESSIONAL SKILLS:

- **Financial Market Trading Systems:** Aladdin (green package, explorer, VarMar), Bloomberg, Omgeo, Tradeweb, Market Access, Charles River Development, MarkitTrade Manager, Eagle Investment System; STAR
- **CRM: Salesforce** CPQ
- **Reporting Software(s):** Seismic, Clearwater Analytics, Sylvan, Vermillion Management Scientist, MAS 500, Business Object, Jetsa, Frx, AS 400. FOCUS. I series, I portal, MS Visio, Power BI, Qlickview, Sharepoint, Visual Studio, Tableau, Doclink, and Microservices.
- **Accounting Software(s):** Quick Books, EPICOR, Concur, Oracle Financial, Microsoft Dynamic, Hyperion, Fusion, Adaptive Insights.
- **Data Basing:** AWS Redshift, Aurora, Titan, Google Cloud, Oracle TOAD MS Access, SPSS, SQL Server, SAS, GreenPlum, Mongos DB, Postgres Sybase, Oracle, SAS, JSON, Data lakes, Selenium, Databricks
- **Project Management:** MS Project, MS Visio, JIRA-SCRUM/AGILE, RCA, SDLC, Quality Center HP
- **ERP:** SAP Fico, BOP, Encompass.
- **Intergrations:** Hadoop, Informatica, Talend, SFTP, API (Rest and SOAP), Mulesoft
- **Framework:** CSS, C-Sharp, .NET, node.js, PyTorch
- **ETL:** Informatica, Pentaho, REST API
- **Languages:** FIX, FPML, SQL, VBA, JAVA, React, Python
- **Cloud Computing:** Azure, AWS

EXPERIENCE:

Department of Homeland Security CISA | Florida

Enterprise Architect (Contractor):

March 2024 – March 2025

- Designed and implemented end-to-end cybersecurity architectures, ensuring robust protection of enterprise systems against emerging threats and vulnerabilities.
- Led the development of secure network infrastructures, integrating firewalls, intrusion detection systems, and encryption protocols to safeguard critical assets.
- Collaborated with stakeholders to create security policies and standards, aligning cybersecurity strategies with business goals and compliance requirements.
- Evaluated and recommended security technologies, driving the adoption of advanced threat detection and mitigation solutions.
- Architected multi-layered defense mechanisms, incorporating identity and access management (IAM), encryption, and incident response frameworks to enhance overall security posture.
- Developed cloud security architectures for hybrid environments, ensuring secure data transmission and storage across cloud platforms.
- Developed and optimized data transformation workflows in DBT for efficient data modeling in Snowflake. Conducted security risk assessments and vulnerability analyses, providing actionable recommendations to mitigate potential cyber threats.
- Integrated cybersecurity solutions with DevSecOps practices, automating security checks throughout the software development lifecycle.
- Designed security monitoring and incident response systems, improving real-time threat detection and reducing incident resolution time.
- Configured and optimized Azure Data Factory (ADF) pipelines for orchestrating data movement and transformation.
- Lead the cost and performance analysis of running workloads on Azure/Fabric.

- Designed and implemented Azure SQL Database solutions, including query optimization and data integration.
- Developed and managed Azure Blob Storage, utilizing Blob Storage APIs for secure data retrieval and processing.
- Automated failure monitoring for ADF pipelines using Azure Logic Apps, triggering alerts and email notifications based on error conditions.
- Carried out end-to-end implementation and tuning of Actimize scenarios (SAM/RCM) to detect suspicious activity and reduce false positives.
- Created and delivered case management workflows and compliance reports in Actimize, improving investigation efficiency and regulatory adherence.
- Integrated Power BI with Azure Blob Storage and SQL databases for real-time reporting and analytics.
- Developed Logic Apps workflows to automate processes, including condition-based email triggers and API calls.
- Implemented Power Apps solutions with Azure services to enhance business operations and workflow automation.

Goldman Sachs (Contract) Florida

Techno Functional Consultant

September 2023 - December 2023

- Implemented and managed compliance systems for capital market trading, ensuring adherence to regulatory frameworks and industry standards to mitigate risks and maintain a secure trading environment.
- Created optimized SQL queries and ETL scripts for Actimize data integration, enhancing system performance and reporting accuracy.
- Carried out scenario validation, testing, and deployment in Actimize, ensuring compliance with regulatory standards.
- Developed and delivered user training sessions and documentation for Actimize RCM, improving adoption and investigation workflows.
- Developed and executed robust compliance protocols, overseeing the integration of surveillance tools and automated reporting systems to monitor trading activities and detect potential rule violations.
- Implemented decentralized data validation and cryptographic security measures to enhance transparency and trust in financial applications.
- Led the implementation and configuration of ECM platforms such as SharePoint and OpenText to streamline document workflows and regulatory compliance.
- Engineered scalable data pipelines using DBT, ensuring performance optimization and best practices in Snowflake.
- Led initiatives to enhance compliance processes, collaborating with internal stakeholders and regulatory bodies to interpret and implement evolving market regulations, fostering a culture of continuous compliance improvement.
- Developed and optimized blockchain-based data pipelines, ensuring efficient consensus mechanisms and tamper-proof transaction records for secure financial operations.
- Implemented AI-driven compliance systems for capital market trading, enhancing real-time risk mitigation.
- Developed machine learning models for compliance monitoring, integrating with surveillance tools to detect potential rule violations.
- Led AI initiatives to automate ETL processes, improving data flow and integrity. Innovated compliance systems by implementing API-driven solutions, fostering interoperability between various trading platforms and compliance tools, thereby improving data accuracy and accelerating decision-making processes.

Prudential | Newark, NJ

Solution Architect

December 2021- February 2023

- Identified, evaluated, designed, and developed software solutions employing technologies identified below that satisfy defined requirements and integrate with existing platforms & materially enhance performance & effectiveness.
- Developed Power BI reports and dashboards leveraging Fabric's Direct Lake mode for real-time insights and enhanced decision-making.
- Led the implementation of a TOGAF-based architecture governance process, resulting in improved architecture alignment and decision-making
- Worked on implementation of BlackRock Aladdin and Charles rivers implementation for Capital market domain.
- Implemented data governance and quality checks within DBT to maintain accuracy and consistency in Snowflake.
- Managed software development process & team including the REST API, back end Java development.
- Developed disaster recovery plans. Monitor & analyze network performance & reports to detect problems, identify inefficient use of computer resources, or perform capacity planning.
- Designed AI/ML architectures using AWS services (Redshift, Aurora, Titan) for data marts and reporting.

- Integrated AI-driven tools in the implementation of BlackRock Aladdin and Charles River for capital markets.
- Designed and implemented solutions for structuring asset-backed loans, optimizing risk assessment and collateral valuation. Engineered AI/ML models for hedging strategies and risk-adjusted return modeling.
- Implemented Random Forest classifiers for portfolio balancing and optimization. Worked on the Order Management systems including but not limited to Aladdin Black Rock and Charles River.
- Developed relationships with stakeholders to develop, technical, strategic and tactical solutions to deliver business goals along with adapting to latest technology. The products under management includes OTC, IRS, CDS, structured products etc
- Created reports and Dashboard via Vermilion and Power BI.
- Developed automated portfolio balancing for holdings by incorporating ML and AI with Random Forest Classifier.

Capital Group Companies | Los Angeles, CA

Sr Solution Engineer

December 2019- November 2020

- Lead the high level architecture of integration of trading platforms with other back office systems.
- Acted as a liaison between Portfolio Managers, Trade desk, Trade support, Accounting and IT department.
- Carried out close collaboration with the PRS User Transition and PRS Remediation tracks focusing on capability transition to PRS alternatives and Change Management planning for potential PRS consolidation.
- Designed and implemented data pipelines in Microsoft Fabric, optimizing ETL processes for improved performance and scalability.
- Developed and engineered financial models to enhance loan underwriting and decision-making processes.
- Lead automation and system enhancement for fixed income derivatives for “majority” assets classes.
- Lead resource planning sessions for cost drivers, infrastructure selection, delivery schedules and QA matrix
- Lead initiatives to enhance the internal order management execution process from decision making to order completion.
- Developed and executed data mastering strategies as an MDM Architect with TAMR, resulting in more efficient data management and improved project performance.
- Created and managed complex financial models utilizing State Street's PAM, ePAM, and PFI software solutions, while also training and supervising team members in their effective usage.
- Led the seamless integration of cross-platform compatibility solutions for a diverse network environment, facilitating efficient communication between Windows and Linux systems in AWS EC2 (cloud 9), streamlining operations, and enhancing user productivity
- Integrated Fabric Lakehouse architecture to streamline data ingestion, storage, and analytics across multiple sources.
- Collaborated with cross-functional teams to implement workflow automation and document lifecycle management using ECM tools, improving compliance and operational efficiency.
- Integrated Snowflake with various data sources, leveraging DBT for ETL/ELT automation and workflow management.
- Developed data mastering strategies incorporating machine learning algorithms with TAMR.
- Utilized Databricks for advanced data manipulation and analysis, driving data-driven decisions.

Warner Bros | Burbank, CA

Product Manager/Solution Architect

June 2018-December 2019

- Lead the design and architect scalable solution using the right AWS services by working with domain teams and optimizing usage of AWS for cost.
- Effectively orchestrated the setup and operation of financial modules in SAP S/4HANA, overseeing General Ledger, Asset Accounting, AR / AP, Cost Accounting, Profit Center Accounting, and Profitability Analysis for enhanced financial efficiency
- Led end-to-end implementation of SAP Cloud Platform Integration (CPI), integrating disparate systems and fostering real-time data exchange to drive operational efficiency and business agility.
- Implemented seamless integrations within the Kinaxis system, leveraging various in house built systems
- Lead enterprise wide architectural evaluation and define end to end data management strategy and design.
- Developed robust and secure RESTful APIs using Node.js, facilitating seamless communication between the server and client applications.
- Lead various projects for the Integration and development of SAP modules GTS HCM, CRM with in-house and third-party applications.

- Created advanced SAP Business Objects reports and dashboards, enabling data-driven decision-making and enhancing business intelligence for key projects.
- Configured and customized SAP FAM to automate asset lifecycle management, enhancing operational efficiency and reducing manual intervention.
- Implemented and optimized integration interfaces using ABAP to facilitate real-time data exchange and enhance overall system coherence.
- Implemented a robust data integration framework to seamlessly fuse datasets within Oracle Fusion.
- Designed advanced algorithms to enhance data processing efficiency in the Oracle Fusion environment.
- Managed the deployment of Oracle Fusion across multiple servers to ensure high availability and scalability.
- Implemented multi-factor authentication (MFA) solutions for a variety of applications and systems, enhancing security and reducing the risk of unauthorized access
- Lead IAM Architecture initiatives for Single-Sign On architecture via OKTA for Workday, Tableau and AWS.
- Lead the solution integration of Oracle Fusion ERP while defining the ERP business processes and mapped existing business processes to Oracle ERP.
- Carried out general consulting and process improvement on Oracle Systems specifically with payable, oracle internet expenses, iSupplier and iProcurement.
- Designed and implemented the AR customer, TCA and invoice interfaces for importing data from legacy systems into Oracle.

Advisors Asset Management | San Diego, CA

Product Owner

December 2017- May 2018

- Lead development of trading platform for fixed income securities.
- Worked on all components of Front, Mid and Back office for Fixed income securities
- Worked on securitization of UITs (Unit Investment Trust) on systems level.
- Collaborated with cross-functional teams to design and deploy analytics solutions using DBT and Snowflake.
- Managed and created analytical reports pertaining to Fixed income trading using Tableau.
- Worked on setting up Order execution, pricing, trader ticket, sales ticket and results files using FIX protocol.
- Orchestrated seamless connectivity and integration triumphs with Mulesoft, fortifying the project's foundations and enabling transformative data flows
- Collaborated with clients and financial institutions to develop scalable, tech-driven lending solutions.
- Designed and developed Visualforce pages to create intuitive user interfaces and enhance user experience, facilitating seamless interaction with Salesforce data and functionalities.
- Worked on setting up configuration for clearing agent for trades.
- Participate in the design, review and detailed architecture of migration of trading platform to Azure platform.

In fo sys | Los Angeles, CA

Sr Consultant

August 2015- November 2016

- Lead Financial transformation projects focused on business process analysis and optimization, organizational change management, program and project management and operational re-engineering
- Worked on various modules of Charles River pertaining to implementation, integration and enhancement with other asset management tools.
- Migrated the legacy accounting system to SAP S/4HANA, this enhanced the financial control as well as AP/AR/BRS capabilities
- Developed and executed asset depreciation strategies in SAP, optimizing financial forecasts and asset valuation accuracy
- Designed automated workflows for loan documentation and compliance, ensuring efficiency and regulatory adherence.
- Implemented custom Apex triggers and classes to automate complex business processes, resulting in a significant reduction in manual workload and increased operational efficiency.
- Executed comprehensive system audits, ensuring the Kinnexis platform's adherence to industry standards and implementing security measures to safeguard sensitive data

- Worked on blotter customization and trade/compliance customization.
- Created functional requirements for Setup – Users, Broker, Broker Rule, Commission Default, Fee Default, Exchange, various lists.
- Provided training and support to end-users to promote understanding and adoption of MFA tools and techniques.
- Monitored and analyzed MFA usage and performance metrics to identify areas for improvement and optimize security protocols.
- Configured and maintained MFA policies and procedures to ensure compliance with industry standards and regulations, such as HIPAA and PCI-DSS.
- Lead end to end data analysis as well as data management

Capital Group Companies (Infosys) | Los Angeles, CA

Sr Consultant

August 2015- March 2016

- Acting as a liaison between Portfolio Managers, Trade desk, Trade support, Accounting and IT department.
- Leading automation and system enhancement for fixed income derivatives for “majority” assets classes.
- Leading resource planning sessions for cost drivers, infrastructure selection, delivery schedules and QA matrix
- Leading initiatives to enhance the internal order execution process from decision making to order completion.
- Leading projects to enhance the order execution between executing broker(s) to clearing broker(s).
- Leading initiatives to integrate internal order execution system(s) with Bloomberg, Markitweb and Reuters.
- Creating variety of KPI to track progress for development as well as quality control.
- Creating analytical realtime data driven reports surrounding the overall order execution, fulfillment and allocation
- Involved at varied level of SDLC and QA of system enhancement, integration and development.
- Working with other BSA and Client manager for scope, requirements, estimates and delivery plan
- Working closely with internal and external stakeholders to deliver results
- Providing system administration support, including FIX(adapter) service management.
- Working with FIX products; fixed income securities, swaps, clo, exotic options, convertible bonds, and commodity derivatives

Orbitz.com | Chicago, IL

Sr Financial System Analyst

November 2013-August 2015

- Support application development to automate credit cards, electronic vendor payments and transactions.
- Assisted in integration of technologies and systems during M&A.
- Provided reporting and analysis and investigate data issues across various transactional systems
- Collaborated with peers and leaders to drive component, architectural, and operational standards.
- Closely worked with finance, accounting, development and operations teams across the organization to identify opportunities and develop strategies to streamline operations of the business
- Participated in new system implementations and financial system upgrades related to AP,AR GL
- Coordinated and verifies system testing for system upgrades, enhancements, and implementations
- Carried out extensive testing and debugging to optimize performance and reliability of Oracle Fusion.
- Developed custom modules to extend the functionality of Oracle Fusion, addressing specific business needs.
- Orchestrated training sessions to upskill team members on the features and usage of Oracle Fusion.
- Configured Core HR & Payroll modules, including defining organizational structures, pay elements, and payroll processing rules.
- Developed Fast Formulas to automate calculations for payroll, benefits, and compensation.
- Designed and implemented workflows for approvals in Employee Self-Service (ESS) and Manager Self-Service (MSS).
- Managed security roles and data access by configuring role-based security and user provisioning.
- Integrated Oracle HCM with third-party applications using HCM Extracts, BI Publisher, and REST/SOAP APIs.

Blue Cross Blue Shield of Michigan | Detroit, MI.

Sr Business Analyst, Delivery Support System

December 2012 - November 2013

- Carried out Data analysis to capture risk measurements of members to be reflected into incentive plans
- Carried out compliance analysis to accurately report changes in the members profiles
- Took initiatives to improves and consolidate business process to eradicate redundancies and bottle necks
- Driven customer analytic initiatives from inception to business acceptance
- Responsible for identifying opportunities and collaboratively generating reasonable and effective solutions.
- Developed business cases to support business solutions

PNMAC LLC | Moorpark, CA

Business Performance Analyst, Retail

March 2012 - November 2012

- Managed retail division's database by using SQL server 2008 R2.
- Compiled end to end process reporting of entire retail's pipeline of loans.
- Managed projects for the development of financial & business process applications
- Created and managed the automated reports to provide 360⁰ visibility of business functions.
- Worked closely with internal partners to quantify scored cards to track and achieve strategic goals.
- Worked with internal and external vendors to provide smooth functioning of Analytic business processes.
- Assisted Marketing division with statistical reporting to enhance varied campaigns to cut cost and increase the return rate.
- Worked with IT to implement HRIS system essentially to manage the telephony, productivity, earnings and time management.

Bank of America | Simi Valley, CA.

Intermediate Financial Analyst: Finance; Transaction Controls

October 2011 - March 2012

- Carried out the profitability analysis on the subserviced loans for reporting purposes.
- Leveraged data analytics and technology solutions to assess asset performance and mitigate risks.
- Assisting in acquisition of originated loans and selling off defaulted loans.
- Reporting on the liquidation and filing claims for defaults (swaps)
- Assisting in the securitization of the loans.
- Cleared fees and costs of investor or borrower through billing or claim filing.
- Maintained the tracks of databases for all fee movement of transactions.
- Developed, implemented, and provided ongoing quality assurance over the transaction process.
- Identified the control and operational deficiencies and provided reporting results to implement policies.
- Maintained and updated databases for necessary backup to ensure completeness of audit
- Created, evaluated, and updated the process maps
- Researched and resolved operational issues and completed projects (building action plans and driving execution) as needed

Bank of America | Simi Valley, CA

Bookloss Analyst: Risk Management Department

February 2010 - October 2011.

- Audited default/liquidation process for all FHA loans and REM transactions to ensure compliance with federal/state regulations.
- Reconciled financial transactions (forensic) to ensure maximum recovery for BAC.
- Ran variance analysis for the occurrence and expected errors for reporting purposes.
- Assisted in the automation of the book loss process using Excel and Access models.
- Prepare monthly reports on monetary losses due to curtailments.
- Identify and report areas of financial risk and exposure.
- Review exceptions in the book loss tracking system and book loss population.
- Responsible for the day-to-day resolution of complex problems and the execution of complex transactions for the business unit, or units, including research.
- Initiated projects and alternatives to improve operations efficiency.

EDUCATION:

- MBA in Finance. California Lutheran University, Thousand Oaks, CA February 2011
- BS in Finance California State University, Northridge, CA August 2007
