SKILLS

- Technology Strategy
- Technology Design & Architecture
- API Integration
- DevOps/DevSecOps
- Platform Engineer
- Data Strategy
- Cloud Computing
- Vendor/Platform Selection

EDUCATION

2002 - 2006
University of Mary Washington
Bachelor's of Science
Computer Science

PROFILE

Proven software & systems architect with 20 years in technology services delivering: cloud solutions, API/integration frameworks, and DevSecOps operating models. Experienced designing scalable architectures, defining standards and reference implementations, modernizing legacy systems, and partnering with delivery teams to ship production outcomes for partners ranging from single-product start-ups to Fortune 100 enterprises and federal agencies.

WORK EXPERIENCE

Avyka

2024 - PRESENT

Field CTO & Member, Board of Directors

**C2C via Private Consulting Brand*

- **Partnered with clients to translate business vision and technology constraints into end-to-end architecture roadmaps**, then led hands-on delivery of the resulting solutions from design through implementation.
- **Defined and Led execution** of technical strategy for DevSecOps and platform engineering services, establishing architecture standards, delivery methodology, and quality controls across engagements.
- **Established repeatable implementation assets** including accelerators, templates, and playbooks, and mentorship to DevOps/platform engineers to improve consistency and delivery quality.
- **Led technical sales/solutions architecture** (solutioning, scoping, estimates, proposals) and served as senior technical liaison with clients and partner ecosystems.
- Owned corporate **Architectural Review Board** and **Technology Steering Committee** to ensure standards-driven architecture decisions and consistent implementation across programs.

Apisero (a NTT DATA acquisition)

2022 - 2024

Vice President, Technology

- **Led solution development & delivery** for the following service delivery practices: enterprise integration, cloud computing, DevSecOps, QA automation, and open-source development ensuring high-impact client outcomes.
- **Served as principal solution architect for strategic deals**, driving technical strategy and aligning executive stakeholders with client needs.
- **Directed urgent client remediation efforts** to address technical debt, stabilize systems, and resolve critical technology issues.
- **Managed technical alignment within alliance-driven sales channels**, collaborating with Independent Software Vendors (ISV) to strengthen market positioning and support revenue growth.

TECHNICAL PROFICIENCIES

- APIs & Microservice Architecture
- Data Architecture
- CI/CD
- TestOps
- SecOps
- Infrastructure as Code (IaC)
- Infrastructure as a Service (IaaS)
- Platform as a Service (PaaS)
- Software as a Service (SaaS)
- Integration Platforms as a Service (IPaaS)
- Docker (Containerization)
- Relational Databases
- Open Source Programming
- QA Automation
- Agile Methodologies
- Process Improvement

Halfaker and Associates (a SAIC acquisition)

2018 - 2022

Engineering Director

- **Built a scalable management and delivery framework** to standardize best practices and improve consistency across 30+ client programs.
- **Managed all corporate engineering practices** for a 550 employee digital services organization. Practices included: Software Engineering, Cloud Engineering, DevSecOps, Quality Assurance, and User Experience (UX)
- **Designed an led implementation of in-house cloud-native IT operations environments** compliant with SOC 2, SOX, and CCMI L3.
- **Drove technical solution building for all clients** developing including long-term technology roadmaps, software, and staff procurement plans

Mountain State Software Solutions (a Argano acquisition)

2014 - 2019

Director, DevOps

- **Served clients as an integration architect and team lead** for Enterprise Integration (MuleSoft) and DevOps solutions for clients including Harvard University, Weight Watchers International, Amtrak, and University of South Florida.
- **Joined as employee #4** and helped scale the company to 100+ employees, leading technical teams and providing hands-on Integration and DevOps solutions direct to partners.
- **Built and scaled a DevOps practice from scratch** providing partners with best-in-class CI, CD, security, and quality control automations and approval gates.

Early Career (Various Companies)

2006 - 2014

Product Lead, Scrum Master, Software Engineer

- **Integrated Product Leadership** – Managed project execution and served as the key technical decision-maker delivering solutions across enterprise integration, IAM, and cybersecurity threat awareness.
- **Software Engineering & Development** – Designed and implemented software solutions across various domains, including web application development, ETL processing, and enterprise service bus (ESB) architecture.
- **Emerging Technology & Innovation** – Contributed to cutting-edge projects in facial recognition and native speech-to-text applications, applying advanced algorithms and machine learning techniques.
- **Legacy Engineering & Architecture** – Developed and optimized SOAP-based web services, enhancing system interoperability and scalability in enterprise environments.
