GitHub Project Samples:

- <https://github.com/yucanxiang>
- e-commerce-joy.netlify.app

EDUCATION:

Bachelor of Science in Chemical Engineering | University of California, Davis
Computing Skills for Scientists Certification | City College of San Francisco

TECHNICAL SKILLS:

Languages: React, Angular, Java, JavaScript, TypeScript, HTML, CSS, Python, C#, .NET
Web Services: RESTful APIs, NodeJS
Unit Testing: Jest
Cloud Deployment: AWS, Kubernetes, Azure
Data Science: Tableau, MySQL, Python

EXPERIENCE:

Feb 2023 – June 2023

Mobile Software Development Bootcamp

- Learn iOS App development with SwiftUI, Core Data and MVVM
- Tech Stack: SwiftUI and Core Data

Jan 2022 – May 2022

Software Development Bootcamp

- Advanced frontend applications training, development, & testing (ReactJS, Vue, Angular), keeping skills fresh
- Project Samples: e-commerce-joy.netlify.app
- Tech Stack: ReactJS to build an eCommerce store

Sep 2022 - Nov 2022

Software Developer | Amazon | Remote

- Developed and maintained web applications using Angular 12 for the front end and ASP.NET for the back end
- Implemented responsive design principles to ensure optimal user experience across various devices and browsers
- Collaborated with UI/UX designers to translate wireframes and mockups into functional, interactive web applications
- Integrated RESTful APIs and third-party services to enhance application functionality
- Implemented user authentication and authorization systems for secure access to application features
- Conducted code reviews to ensure code quality, performance and adherence to best practices
- Worked closely with QA teams to identify and address software defects and bugs

Oct 2021 - Nov 2021

Data Analyst | LinkedIn | Remote

- Conducted comprehensive data analysis using MySQL and Python to provide actionable insights to the marketing and product teams
- Designed and executed A/B tests to evaluate the impact of website changes, resulting in a 15% increase in conversion rates
- Collaborated with cross-functional teams to identify key performance indicators and develop data-driven strategies
- Created interactive dashboards using Tableau, presenting key metrics and trends to stakeholders
- Developed predictive models to forecast customer behavior and inform marketing strategies

Aug 2014 - Sep 2021

Frontend Developer / Data Analyst / Ultra Clean Technology / Fremont, CA

- Assisted senior analysts in data cleaning, transformation, and visualization tasks using Excel, MySQL and Python
- Conducted exploratory data analysis to identify trends and patterns in customer behavior
- Prepared weekly and monthly reports, highlighting performance metrics and recommendations for improvement
- Head the development and maintenance of RESTful APIs with .NET to integrate them with the internal data dashboards
- Work with design, product, and back-end teams to create 5 web products with Angular 11
- Create 3 efficient and reusable front-end systems to drive web UI applications to marketplace
- Design and implement SEO strategies for user acquisition, driving acquisition up by an average of 27% each month
- Optimize 12 applications for maximum speed and scalability
