Professional Summary

Dedicated and innovative iOS Developer with over 7 years of experience in designing, developing, and managing applications for iOS. Proficient in Swift, Objective-C, and modern iOS development practices. Experienced in working with diverse teams and integrating various technologies to create user-centric, efficient applications.

WORK EXPERIENCE

Building Start

Senior iOS Developer

Minneapolis, MN | April 2017 - current

- Spearheaded the development of iOS applications, ensuring feature parity with Android counterparts
- Managed full application lifecycle from concept design to release and post-release support
- Modernized legacy applications by integrating Swift, enhancing performance and maintainability.
- Developed Bluetooth integration for airflow meters in the application, boosting operational efficiency
- Managed SQLite database for robust data management, ensuring functionality in offline modes
- Maintained applications' compatibility with the latest iOS versions and hardware

Aster Labs

iOS Developer

Minneapolis, MN | June 2016 - April 2017

- Developed iOS applications with a focus on accessibility for visually impaired users
- Managed app lifecycle, including deployment and Apple's release process
- Managed application development lifecycle including design, development, release, and support
- Integrated and interfaced with external FLIR cameras, using OpenCV and facial recognition technologies for thermal and visual image processing.

SKILLS

- **iOS Development:** Proven experience as an iOS Developer with a strong understanding of iOS lifecycle, human interface guidelines, and best practices. Proficient in Swift and Objective-C, with an in-depth understanding of iOS SDK and various frameworks
- **APIs and Networking:** Experienced in working with RESTful APIs, networking, and JSON for seamless data integration
- **UI/UX Design:** Solid understanding of UI/UX design principles and best practices, ensuring the creation of intuitive and user-friendly interfaces
- **Version Control and Agile Practices:** Skilled in using version control systems like Git. Familiar with Agile methodologies, contributing to efficient and collaborative project management

EDUCATION

Computer Science Software

Engineering College of St.

Scholastica September 2014 - June 2017 Duluth, MN

B.S.

Psychology

Brigham Young University January 2008 - April 2012 Rexburg, Idaho
