

DANIEL ANDRADE

Lead Enterprise Architect | Cloud Architecture, API Design, Security Governance

Castro Valley, California, United States | DanielA.InMotion@outlook.com | 17137315132

<https://www.linkedin.com/in/daniel-andrade9>

SUMMARY

Senior architect with over 7 years driving **enterprise architecture**, **cloud solutions**, and **security governance** across complex programs. Skilled in defining **target-state architectures**, **API integration patterns**, and **observability standards** to enhance **scalability** and **resiliency**. Proven ability to lead cross-functional teams, mentor architects, and align technical strategies with business objectives. Adept at translating **business requirements** into robust technical solutions while maintaining **operational excellence** and **risk management**. Committed to a product mindset that drives continuous improvement and measurable impact in fast-paced environments.

SKILLS

- Enterprise Architecture: **architecture governance**, target-state design, decision logs, ADRs
 - Cloud & Infrastructure: **cloud architecture**, CI/CD, DevOps, release management, rollback strategies
 - Integration & APIs: **API design**, versioning, contracts, system boundaries, data ownership
 - Security & Risk: **security architecture**, threat modeling, compliance, risk registers, mitigation planning
 - Observability: **logging**, **metrics**, **tracing**, SLOs, incident readiness
 - Software Development: **Java**, **Spring Boot**, REST APIs, microservices, scalable systems
 - Workflow & Methodologies: **agile**, MVP shaping, stakeholder management, architecture working groups
 - Soft Skills: **adaptability**, problem solving, relationship-building, communication, mentoring
-

PROFESSIONAL EXPERIENCE

Capital One
Lead Enterprise Architect

San Francisco, California
September 2024 - Present

- **Own** target-state **enterprise architecture** and establish **principles**, **guardrails**, and **decision governance** to ensure alignment across **application**, **data**, **integration**, **security**, **cloud**, and **DevOps** domains.
- **Review** and **approve** high-level and low-level designs for major workflows, ensuring consistent architectural patterns across multiple delivery teams.
- **Drive** non-functional requirements including **performance**, **resiliency**, **security**, **scalability**, and **maintainability** to meet enterprise standards.
- **Develop** baseline templates for **logging**, **tracing**, and **error handling**, improving system observability and incident response by 30%.
- **Translate** business requirements into architecture-relevant specifications and collaborate with product owners and functional leaders to shape MVPs and release sequencing.

- **Define** API and integration standards including **versioning**, **contracts**, and **system boundaries** to streamline cross-team collaboration and data governance.
- **Establish** security architecture guardrails and lead **threat modeling** initiatives, reducing potential vulnerabilities by 25%.
- **Set** CI/CD pipeline strategies and release patterns that improved deployment frequency by 40% while maintaining rollback safety.
- **Chair** architecture working groups, fostering alignment among architects, tech leads, QA, and DevOps, enhancing cross-team communication and decision clarity.
- **Mentor** solution architects and senior engineers, elevating architecture maturity and technical leadership within the organization.

Challenges and Solutions: Balancing rapid delivery demands with stringent security and compliance requirements while maintaining architectural consistency across diverse teams.

Dealpath

Senior Solution Architect

San Francisco, California

November 2020 - September 2024

- **Led** design and implementation of scalable **cloud-native** architectures supporting high-concurrency workflows with 99.9% uptime.
- **Collaborated** with product and engineering teams to define **API versioning** and **integration strategies** that reduced data inconsistencies by 20%.
- **Implemented observability standards** including **metrics**, **logging**, and **tracing**, enabling proactive incident detection and 35% faster resolution times.
- **Established** architecture decision records (ADRs) to document tradeoffs and maintain transparency across stakeholders.
- **Guided** non-functional requirement prioritization focusing on **security**, **performance**, and **maintainability** to support evolving business needs.
- **Defined** data model evolution and governance policies ensuring compliance with audit and retention standards.
- **Supported** agile teams in MVP shaping and release planning through clear architecture roadmaps and dependency management.
- **Mentored** junior architects and engineers, fostering a culture of continuous learning and architectural discipline.
- **Facilitated** stakeholder communication by presenting architecture options and risks, enabling informed decision-making.
- **Contributed** to AI-assisted delivery process integration, balancing innovation with quality and traceability.

Challenges and Solutions: Driving architecture consistency across multiple agile pods while adapting to rapidly changing product requirements and technology stacks.

CCGroup Inc.

Solution Architect

San Mateo, California

September 2019 - November 2020

- **Designed** solution architectures aligned with business goals and technical constraints for enterprise clients.
- **Collaborated** with cross-functional teams to develop integration patterns and API contracts that improved system interoperability.

- **Defined** security controls and compliance measures tailored to client-specific regulatory requirements.
- **Developed** architecture documentation and decision logs to support knowledge sharing and governance.
- **Supported** release planning by establishing CI/CD best practices and rollback strategies.
- **Conducted** threat modeling sessions to identify and mitigate potential security risks early in the development lifecycle.
- **Engaged** with stakeholders to clarify requirements and communicate technical tradeoffs effectively.
- **Promoted** architectural standards and reusable components to increase delivery efficiency.
- **Enhanced** monitoring and alerting frameworks, reducing incident response times by 25%.
- **Adapted** solutions to evolving client needs, demonstrating strong problem solving and relationship-building skills.

Challenges and Solutions: Aligning diverse client requirements with scalable, secure architectures while managing tight delivery schedules.

University of California, Davis
Software Engineering Intern

Davis, California
January 2019 - June 2019

- **Developed** software components using **Java** and **Spring Boot** to support research projects.
- **Implemented** RESTful APIs and contributed to integration testing efforts.
- **Collaborated** with academic teams to translate requirements into technical solutions.
- **Improved** code quality and maintainability through peer reviews and refactoring.
- **Documented** design decisions and contributed to project knowledge bases.
- **Demonstrated** adaptability and curiosity by learning new technologies rapidly.
- **Supported** deployment and troubleshooting activities in development environments.

Challenges and Solutions: Balancing learning objectives with project deliverables in a dynamic academic research setting.

UC Davis
Software Development Intern

Davis, California
April 2016 - June 2016

- **Assisted** in developing web applications using **JavaScript** and **HTML/CSS**.
- **Participated** in code reviews and testing to ensure quality standards.
- **Collaborated** with team members to gather requirements and deliver features.
- **Enhanced** user interface components improving usability.
- **Exercised** problem solving and resourcefulness in debugging and issue resolution.

Challenges and Solutions: Gaining foundational development skills while contributing to active projects.

EDUCATION

University of California
Bachelor's degree in Computer Science and Engineering

Davis, California
2015 - 2019

Leadership Public Schools
High School Diploma

Hayward
2011 - 2015
