

DANIEL AGUILAR CHAVIRA

Harlingen, TX 78550 | +1 (956) 426-3303 | daniel19940511@gmail.com

SUMMARY

Experienced professional with a strong focus on developing innovative solutions within the geospatial and transport industries. Proficient in designing real-time data interfaces and utilizing Vue.js for dynamic web applications. Committed to delivering high-quality software solutions that enhance operational efficiency and user experience.

SKILLS

- Vue.js, REST APIs, SOAP APIs, BPMN, Workflow Automation, Bizagi BPM Suite
- SQL, Data Modeling, Data Model Design, Database Software Proficiency, Debugging, Technical Documentation
- Business Process Modeling, Stakeholder Management, Business Requirements, Process Optimization, Integration Solutions, System Integrations
- Software Testing, Debugging Techniques, Deployment Strategies, Application Performance Monitoring
- Analytical Thinking, Problem Solving, Requirements Analysis, Data Analysis, User Acceptance Testing

EDUCATION

Bachelor's Degree in Computer Science
Texas Tech University

Aug 2012 – May 2016
Lubbock, TX

PROFESSIONAL EXPERIENCE

EPAM Systems
Software Development Engineer

Oct 2023 – Dec 2025
Remote

- Designed and developed workflows utilizing Bizagi BPM Suite and Workflow Automation to streamline business processes and enhance operational efficiency.
- Configured forms, rules, and integrations in Bizagi while ensuring compliance with business requirements and industry standards.
- Analyzed complex business requirements and translated them into effective BPM solutions using BPMN and Data Modeling techniques.
- Integrated REST APIs and SOAP APIs with external systems to facilitate seamless data exchange and improve system interoperability.
- Performed rigorous testing and debugging of Bizagi applications, ensuring high-quality deliverables and adherence to project timelines.
- Provided comprehensive technical support and documentation for implemented solutions, enhancing user understanding and system usability.
- Conducted client-facing workshops to demonstrate Bizagi functionalities and gather feedback for continuous improvement.
- Collaborated with stakeholders to identify process bottlenecks and recommend solutions using Process Optimization methodologies.
- Led the deployment of Bizagi applications, ensuring successful implementation and user adoption across various departments.
- Utilized SQL for data extraction and analysis, supporting informed decision-making and strategic planning initiatives.
- Developed technical documentation outlining system configurations and user guides, facilitating knowledge transfer and operational continuity.

UnitedHealth Group
Software Engineer

May 2020 – Sep 2023
Remote

- Developed and maintained SQL databases, ensuring data integrity and optimizing performance for various applications.
- Collaborated with cross-functional teams to gather business requirements and translate them into technical specifications using Data Modeling techniques.
- Implemented data migration strategies to transition legacy systems to modern platforms, enhancing data accessibility and usability.
- Conducted thorough testing and debugging of applications, utilizing Debugging techniques to identify and resolve issues effectively.
- Participated in client meetings to discuss project progress and gather feedback, ensuring alignment with business objectives.
- Created detailed technical documentation for database structures and application workflows, promoting clarity and understanding among team members.
- Utilized Technical Documentation to outline system functionalities and user instructions, improving user experience and training efficiency.
- Engaged in continuous learning of emerging technologies to enhance software development practices and improve application performance.
- Supported the integration of third-party applications through System Integrations, ensuring seamless data flow and operational efficiency.
- Analyzed user feedback to identify areas for improvement in existing applications, leading to enhanced user satisfaction and engagement.

TaskUs
Software Engineer

Jun 2016 – Apr 2020
New Braunfels, TX

- Assisted in the development of data models to support application functionalities and ensure data consistency across platforms.
- Engaged in debugging processes to identify and rectify software issues, enhancing application reliability and user experience.
- Collaborated with team members to implement best practices in software development, focusing on Data Modeling and Debugging techniques.
- Participated in code reviews to ensure adherence to coding standards and improve overall code quality.
- Conducted user training sessions to demonstrate application features and gather feedback for future enhancements.
- Developed and maintained technical documentation for software applications, ensuring clarity and ease of understanding for end-users.
- Utilized SQL for data manipulation and reporting, supporting business intelligence initiatives and informed decision-making.
- Engaged with stakeholders to gather requirements and provide updates on project status, ensuring alignment with business goals.
- Contributed to the integration of new features based on user feedback, enhancing application functionality and user satisfaction.
- Supported the testing phase of software development, ensuring all functionalities met specified requirements and quality standards.
