

Peter Mains

Lead Enterprise Architect

4807704457 • petermains112@gmail.com

4237 E TYSON ST, Gilbert, AZ

Summary

Dynamic and results-oriented Lead Enterprise Architect with extensive experience in architecture leadership, solution design, and stakeholder management. Proven ability to drive alignment across technology domains and deliver high-quality architecture that meets business needs.

Skills

Architecture Leadership: target-state architecture, principles, guardrails, decision governance

Solution Architecture: HLD/LLD review, NFRs, baseline templates, reference implementations

Business Alignment: BRD translation, LLF shaping, stakeholder engagement, decision-making

Integration Strategy: API patterns, data ownership, versioning, governance

Security Management: security guardrails, threat modeling, compliance considerations

Operational Excellence: CI/CD, environment strategy, observability standards, incident readiness

AI Enablement: AI-assisted delivery, standardization, measurement

Stakeholder Management: architecture working group, mentoring, communication

Professional Experience

Senior Enterprise Architect at Tech Innovations LLC (Jan 2022 - Present)

- Led the development of **target-state architecture** and established **governance** frameworks.
- Reviewed and approved high-level and low-level designs for critical workflows.
- Collaborated with product owners to shape minimum viable product specifications.
- Defined API integration patterns ensuring consistent **data ownership** and management.
- Established security architecture **guardrails** and maintained a risk register.
- Implemented **CI/CD** strategies to enhance operational excellence and **incident readiness**.
- Developed **observability standards** for monitoring system health and performance.
- Mentored solution architects and senior engineers to elevate architectural maturity.
- Communicated architectural decisions and rationales clearly to stakeholders.
- Facilitated **architecture working group** sessions to align cross-functional teams.

Enterprise Solutions Architect at Shoals Technologies Group, Inc (Aug 2017 - Dec 2021)

- Designed and implemented enterprise solutions aligning with business objectives.
- Reviewed architecture frameworks ensuring compliance with industry standards.

- Led discussions on trade-offs and options with stakeholders during project phases.
- Developed data **governance** strategies to manage data lifecycle effectively.
- Supported the evolution of data models and facilitated migration strategies.
- Conducted **threat modeling** to identify and mitigate potential security risks.
- Established release and rollback patterns to ensure seamless deployments.
- Created **baseline templates** for logging and error handling across applications.
- Facilitated workshops to enhance understanding of architecture **principles**.
- Collaborated with DevOps teams to ensure infrastructure aligns with architectural standards.

Solutions Architect at Innovative Tech Solutions (Jul 2009 - Jul 2017)

- Developed comprehensive architecture solutions for enterprise applications.
- Worked closely with cross-functional teams to ensure alignment on project goals.
- Conducted architecture reviews to maintain consistency across projects.
- Translated business requirements into technical specifications for development teams.
- Defined integration strategies that enhanced system interoperability.
- Created and maintained documentation for architectural decisions and designs.
- Implemented observability practices to monitor application performance.
- Collaborated on the development of security protocols and compliance measures.
- Facilitated training sessions for teams on new architectural practices.
- Engaged with clients to gather feedback and improve solution designs.

Education

Master of Degree in Data Science - University of Michigan (Apr 2023) Relevant Coursework: Machine Learning, Advanced Algorithms, Database Systems & Data Management
