PROFESSIONAL SUMMARY

Experienced Mobile applications Developer (Android, IOS, React Native) with over 9 years of experience in developing native mobile applications.

Proficient in Java and Kotlin, with extensive experience using Android Studio, XML, JSON, and RESTful APIs. Skilled in database management using SQLite and Room, and proficient in working with complex UI components such as RecyclerView and Fragments. Adept in building and integrating various services like Activities, Services, and Broadcast Receivers.

Also, Highly proficient iOS developer with over 9 years of experience designing, developing, and maintaining high-quality iOS applications for clients across various industries. Proficient in Swift and Objective-C programming languages and experienced in using Xcode, iOS SDK, and various third-party libraries and frameworks for networking, image caching, and analytics. Skilled in implementing various iOS features, such as Core Data, auto layout, push notifications, in-app purchases, and location services, to improve user engagement and retention.

I am also highly skilled in developing high-quality cross-platform mobile applications for iOS and Android using React Native. My expertise in the framework allows me to efficiently build applications that provide a consistent user experience across both platforms.

PROFESSIONAL EXPERIENCE

Freelance Contractor

Native IOS and Android applications developer September 2022 - Present

- Developed and launched multiple native Android and IOS applications on Google and Apple Play Store with millions of downloads and positive user reviews.

- Supervised the development of complex mobile applications for various clients across diverse industries, including healthcare, finance, and e-commerce.
- Developed custom libraries and APIs to simplify and speed up development, resulting in improved efficiency and reduced code duplication.
- Built and maintained applications with scalable and maintainable codebases utilizing architectural patterns such as MVVM, MVP, and Clean Architecture.
- Implemented Test Driven Development (TDD) practices with JUnit and Espresso to ensure high-quality and bug-free code.
- Mentored and trained junior developers, guiding them in the best practices of Android development and architectural patterns.
- Conducted code reviews and implemented continuous integration and delivery (CI/CD) for improved productivity and efficient code management.
- Collaborated with cross-functional teams, including back-end developers and UX designers, to ensure timely delivery of high-quality products and exceptional user experiences.

React Native Developer, Self employed

01/2021 - Present

- Designed and developed a cross-platform mobile application for a Fortune 500 company, resulting in a significant increase in customer engagement and revenue.
- Built and launched a mobile application that received over 1 million downloads in the first year, showcasing my proficiency in performance optimization, third-party library integration, and user experience design.
- Supervise a team of developers to successfully deliver a complex mobile application for a major sports league, demonstrating my proficiency in project management, version control, and cross-platform development.
- Designed and developed a mobile application for a healthcare provider, including integration with Bluetooth-enabled medical devices, showcasing my proficiency in cross-platform development, API integration, and user privacy and security.
- React Native, JavaScript, Redux, HTML, CSS, Git, Cross-Platform, Third-Party Libraries, Performance Optimization, Animations, Responsive Design, Testing, Emerging Technologies, Open-Source Contributions

Arrivy

Android Developer

December 2018 - January 2021

- Developed and maintained several native mobile applications for Android using Java and Kotlin programming languages.
- Utilized Android Studio IDE and Gradle build system to manage and build the project codebase.
- Worked with RESTful APIs, XML, JSON, and other data formats for data transfer and data storage using SQLite and Room databases.
- Developed complex user interfaces using custom views, fragments, and layout resources in accordance with Material Design guidelines.
- Implemented various Android components such as activities, services, broadcast receivers, and content providers to ensure smooth user experience.
- Integrated Google Play Services and Firebase services including Push Notifications, In-App Purchases, and AdMob.
- Integrated location-based services using the Google Maps API and Google Places API.
- Optimized app performance using Memory Management, ProGuard, and Performance Optimization techniques.
- Implemented low-level features using Android NDK, OpenGL ES, Bluetooth Low Energy (BLE), and NFC.
- Developed applications for various Android devices including Android Wear, Android Auto, and Android TV.

Invozone, Software Engineer (IOS)

Nov 2014 – Nov 2018

- Developed a fitness tracking application for iOS that allowed users to track their workouts and monitor their progress over time. Utilized Core Data and SQLite to store user data, integrated with Apple HealthKit to track physical activity, and utilized push notifications to remind users of their daily goals.

Technical Skills: Swift, Core Data, SQLite, HealthKit, Push Notifications

- Developed a social media application for iOS that allowed users to share photos and videos, comment on posts, and interact with their friends. Utilized Core Animation and Core Graphics frameworks to create custom animations and user interfaces, integrated with REST APIs to handle network requests, and utilized push notifications to notify users of new activity.

Technical Skills: Swift, Objective-C, Core Animation, Core Graphics, REST APIs, Push Notifications

- Developed an e-commerce application for iOS that allowed users to browse and purchase products from a catalog. Utilized MapKit and Core Location frameworks to provide location-based services, integrated with payment gateways to process transactions, and utilized in-app purchases to enable users to buy products within the app.

Technical Skills: Swift, Objective-C, MapKit, Core Location, Payment Gateways, In-App Purchases

- Developed a music streaming application for iOS that allowed users to search for and play music, create playlists, and share songs with their friends. Utilized AVFoundation and Core Audio frameworks to handle audio playback, integrated with REST APIs to fetch music data, and utilized in-app purchases to enable users to upgrade to a premium subscription.

Technical Skills: Swift, AVFoundation, Core Audio, REST APIs, In-App Purchases

- Developed a mobile gaming application for iOS that allowed users to play casual games and compete with other players. Utilized SpriteKit and SceneKit frameworks to create game elements, integrated with Game Center to handle leaderboards and achievements, and utilized push notifications to notify users of new challenges.

Technical Skills: Swift, SpriteKit, SceneKit, Game Center, Push Notifications.

EDUCATION

Islamia University Bahawalpur

Bachelor of Science in Computer Science

2009-2014

TECHNICAL SKILLS

- Native Android development:

Java, Kotlin, Android Studio, RESTful APIs, SQLite, Room, RecyclerView, JSON, RESTful APIs, SQLite, Room, RecyclerView, Fragments, Activities, Services, Broadcast Receivers, Intents, Material Design, Google Play Services, Firebase

- React Native:

React Native, JavaScript, Redux, Git, HTML, CSS, Jest, Cross-Platform Development, Mobile Apps, Asynchronous Programming, Functional Programming, Third-Party Libraries, Performance Optimization, Animations, Responsive Design, Network Programming

- Native IOS development:

Programming languages: Objective-C, Swift

Development tools: Xcode, Interface Builder, Cocoapods

iOS frameworks and APIs: UIKit, Foundation, Core Data, Core Animation, Core Graphics, AVFoundation, Core Audio, MapKit, Push Notifications, In-App Purchases, Location Services

Networking libraries: AFNetworking, RestKit, AlamoFire

Image libraries: SDWebImage, AFNetworking, Kingfisher
