PROFESSIONAL EXPERIENCE

Nevas Tech

04/2024 – Present

Lead Dynamics 365 Architect

- Delivered enterprise-wide Dynamics 365 implementations across Finance, Supply Chain, CE, Field Service, HR, Project Operations, and Commerce.
- Designed and deployed scalable Power Platform solutions, including Canvas and Model-Driven Power Apps, Power Automate workflows, Power BI dashboards, and AI Builder automation.
- Led integrations using Azure Logic Apps, Functions, Service Bus, API Management, Blob Storage, and third-party tools (REST/OData, SSIS, MuleSoft, KingswaySoft, BizTalk).

- Directed CI/CD pipelines, automated deployments, version control, and ALM governance with Azure DevOps and GitHub.
- Provided solution architecture, requirements alignment, and stakeholder collaboration across global transformation programs.
- Oversaw post-go-live optimization, adoption strategy, and continuous improvements to maximize business value.

MetaOption

06/2020 – 03/2024

Senior Dynamics 365 Consultant

- Delivered complex Dynamics 365 Finance, CE, and Business Central solutions for enterprise clients across multiple industries.
- Configured entities, forms, plugins, workflows, business rules, portals/Power Pages, role-based security, and hierarchy models.
- Built scalable Power Apps solutions and automated workflows with Power Automate to streamline enterprise processes.
- Developed analytics solutions using Power BI and Customer Insights for advanced reporting and predictive analytics.
- Managed Azure-based integrations with REST APIs, third-party apps, and ERP systems to ensure seamless scalability.
- Collaborated with business leaders, consultants, and global delivery teams using Agile and SAFe methodologies.

Deloitte (Digital)

07/2016 – 05/2020

Senior Dynamics CRM Developer

- Customized Dynamics CRM modules for sales, service, and field operations, ensuring alignment with business needs.
- Developed workflows, plugins, and custom automation to reduce manual effort and improve efficiency.
- Designed and maintained SQL Server solutions (T-SQL, SSRS, FetchXML) for enterprise reporting and dashboards.
- Supported integrations with ERP, marketing, and external systems via REST APIs and middleware tools.
- Partnered with consultants and business analysts to deliver tested, documented, and maintainable solutions.

Plante Moran

05/2013 – 06/2016

Dynamics 365 Developer

- Configured entities, forms, views, and workflows to support Dynamics CRM implementations across sales and marketing.
- Developed custom plugins and business rules for tailored business automation.
- Assisted with data migration and integration using SSIS, KingswaySoft, and custom scripts.
- Supported solution design by collaborating with senior developers and functional consultants.
- Delivered user training, testing, and post-deployment support for smooth adoption.
