PROFESSIONAL SUMMARY

AWS Solution Architect with 11+ years designing and implementing cloud-native, enterprise-scale systems for Fortune 500 companies in Finance, IT, and Telecom. Specializes in secure, high-availability architectures using AWS Control Tower, EKS, IAM, Lambda, and Transit Gateway. Builds Zero Trust environments, automates infrastructure with Terraform and GitHub Actions, and scales Kubernetes workloads across regions. Delivers measurable business value through efficient cloud migrations, cost savings, and compliance with SOC 2, PCI-DSS, and HIPAA. Recognized for aligning deep technical architecture with core business goals. Seeking roles in Fortune enterprises focused on cloud maturity, security, and operational excellence.

TECHNICAL SKILLS

Programming & Scripting: Java, Python, Shell, PowerShell, Go, JavaScript

AWS Cloud Services: EC2, S3, RDS, Lambda, VPC, CloudFront, API Gateway, IAM, CloudWatch, KMS, Route 53, CloudFormation, Config, Transit Gateway, Direct Connect, Backup, Organizations, Control Tower, Secrets Manager, EKS, ECS, CodePipeline, WAF

Infrastructure as Code & Automation: Terraform, CloudFormation, Ansible, Puppet, Chef, Bash, PowerShell, Python

CI/CD & DevOps Tools: Jenkins, GitLab CI/CD, GitHub Actions, Azure DevOps, ArgoCD, CircleCI

Containerization & Orchestration: Docker, Kubernetes, OpenShift, Helm, Istio

Networking & Security Tools: Palo Alto, Fortinet, Cisco ASA, Juniper, Check Point, OpenVPN, Wireshark, Nmap, Cloudflare, Akamai, Zscaler, CrowdStrike Falcon, Carbon Black, Nessus, Qualys, Snort, Suricata, Cisco ISE

Monitoring, Logging & SIEM: Splunk, CloudWatch, Datadog, ELK Stack, Prometheus, Grafana, Microsoft Sentinel, LogRhythm, QRadar

Databases & Storage: Aurora, PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB, Redis, Cassandra, Azure Blob Storage, S3, EBS

Identity & Access Management: Azure AD, Okta, Ping Identity, CyberArk, BeyondTrust, Thycotic, IAM, RBAC, LDAP, Azure MFA, PIM

Other Tools & Technologies: Git, GitHub, Bitbucket, Jira, Confluence, Visio, ServiceNow, Appian, Fenergo, Automation Anywhere

EXPERIENCE

Verizon Wireless Systems

May 2022 – Present

AWS Solution Architect

- Spearheaded design of high-throughput, multi-region EKS-based microservices platform for real-time provisioning of over 10 telecom products.
- Integrated AWS Global Accelerator, Route 53, and CloudFront to ensure sub-100ms latency for mission-critical APIs.
- Developed Helm chart pipelines with ArgoCD and GitOps workflows for consistent Kubernetes deployments across 12 production clusters.
- Implemented enterprise-wide Zero Trust architecture utilizing AWS WAF, Cloudflare Zero Trust, and IAM roles with session-based authentication.
- Enabled end-to-end observability using Datadog, CloudWatch, and AWS X-Ray to analyze failures in over 30 million monthly events.
- Designed BCP/DR strategies through automated failover simulations using Route 53, AWS Lambda, and SSM Automation Documents.
- Delivered scalable API gateway platform managing 7 million monthly requests with throttling and encryption at rest.
- Contributed to SOC 2 Type II certification by developing over 30 custom compliance checks through AWS Config Rules and Python.

AWS Solution Architect

- Designed secure multi-account AWS architecture using Control Tower, SCPs, and Transit Gateway for cloud governance across 20+ business units.
- Architected PCI-DSS compliant network segmentation with AWS Network Firewall and Palo Alto for sensitive financial transactions.
- Developed standardized Terraform modules and CI/CD pipelines through GitHub Actions and Terraform Cloud, provisioning over 1,200 cloud resources.
- Collaborated with enterprise architecture, security, and audit teams to establish reusable architecture blueprints for high-trust environments.
- Enabled deployment of next-gen claims processing system handling over 1.8 million transactions in initial six months.
- Reduced recovery time objectives from eight hours to 45 minutes for critical applications via multi-AZ failover and Route 53 health checks.
- Migrated 25+ financial services to AWS with zero downtime using canary deployments and real-time rollback techniques.
- Authored enterprise-level security automation scripts and templates foundational for audit readiness across all cloud-hosted systems.

Helix Biomedix**Apr 2014 – Oct 2019****AWS Solution Architect**

- Designed secure AWS landing zone with multi-account architecture for 40+ HIPAA-compliant healthcare workloads across EC2, RDS, and S3.
- Developed reusable CloudFormation stacks standardizing provisioning for development, QA, and production environments across eight application teams.
- Configured AWS Config and GuardDuty for real-time compliance monitoring and anomaly detection in patient data pipelines.
- Migrated legacy on-prem EHR systems to AWS, ensuring data encryption at rest and in transit using KMS and private VPC endpoints.
- Facilitated cross-functional cloud governance model, improving deployment readiness for clinical software releases by 15 days.
- Integrated AWS CloudTrail and centralized logging with Splunk, enhancing incident traceability for three cloud-hosted medical applications.
- Achieved \$480,000 reduction in infrastructure spending over three years through auto-scaling and right-sizing policies across EC2 and RDS fleets.
- Led documentation and technical validation efforts, resulting in zero audit findings during two consecutive HIPAA reviews.

EDUCATION**Bachelors in Computer Science**

University of Buea

CERTIFICATIONS

- AWS Solution Architect – Associate
