Experience:

Developer Advocate| Moesif| Remote 2022 - 2023

- Demonstrated the transformative potential of the platform's features to developers, enabling users to analyze API data and derive actionable insights, resulting in a 40% increase in API performance optimization and data analysis efficiency.
- Provided technical guidance and support to developers using the company's API analytics platform, assisting with troubleshooting, answering questions, and addressing integration or development challenges.
- Implemented technical documentation, tutorials, and blogs to integrate the platform, resulting in over 100k views, organic traffic, and user engagement of 45%, contributing to an increase of 20% in organic search rankings.
- Streamlined cross-functional collaboration with product management, driving proactive communication to address developer needs; resulted in a 40% reduction in development bottlenecks and accelerated feature delivery velocity by 20%.
- Prioritize and engage key developer communities through comprehensive strategies, encompassing conferences, meetups, Twitter, and other Social Media, while delivering impactful technical presentations, workshops, and webinars to educate developers about the company's API analytics platform.

Font-End Developer| InvestCloud | Remote 2021- 2022

- Orchestrated seamless partnership across teams to drive comprehensive business solutions, employing system analysis, design, coding, and implementation expertise; achieved a 15% reduction in operational costs and accelerated project delivery by 25%.
- Led the creation of the company's new website structure, including an employee portal, resulting in a more modular system, reducing maintenance time, and costs by 27%.
- Developed and deployed complex reports utilizing Power BI, allowing clients to access real-time financial and operational data in one integrated dashboard, leading to a 30% reduction in decision-making time.

Software Engineer | Experian (Contract) | Remote 2021- 2021

- Executed and tested 5+ enhancement feature requests to improve product functionality, leading to a 25% decrease in customer support tickets and a 20% increase in overall product performance metrics.
- Analyzed and translated requirements into User Requirement Specifications and Functional Requirement Specifications, providing a clear understanding for designers and developers from their respective perspectives.
- Developed applications and tools using object-oriented languages, emphasizing code abstraction, stability, and reuse goals, while concurrently generating three quick prototypes and proof of concepts each week.

Full-Stack Software Engineering Fellow | General Assembly | San Francisco, CA 2020 - 2021

- Developed full-stack applications with in-demand technologies like Python with Django, and Javascript with Express, Node.js, React.js, and Next.js utilizing frameworks such as Angular and React. Expertise includes UI application development and professional web applications using JavaScript, HTML5/HTML, DOM, XHTML, jQuery, CSS3, AJAX, Object-Oriented (OO) JavaScript, and JSON. Experience also extends to utilizing Node.js and Express for making calls (GET, POST, PUT, DELETE) to trigger or fetch data from Restful APIs provided by the backend.

Investment/Client Associate | Alex. Brown a Division of Raymond James | San Francisco, CA 2018 - 2021

- Researched competitor products identified areas of strength and analyzed product weaknesses.
- Drove a 33% increase in the book of business by strategically acquiring large global net worth accounts, adeptly navigating internal and external organizations to identify key stakeholders, address issues, and manage decision-makers effectively.
- Performed deep-dive analysis of global financial markets and macroeconomic indicators, enabling data-driven insights to guide asset allocation decisions resulting in a 15% increase in portfolio returns and outperforming industry benchmarks.

Client Associate | First Republic Investment Management | San Francisco, CA 2015 - 2018

- Assisted in the seamless onboarding of new partners, ensuring integration aligns with business goals.
- Collaborated with internal teams (sales, marketing, product management) to ensure seamless coordination on partner-related initiatives.

Education and Training:

Software Engineering Immersive, 2021| General Assembly | San Francisco, CA

FINRA Series 7 & 63 ; Certified Dispute and Resolution Mediator | San Jose State University | San Jose, CA

Bachelor's in Economics & Communication Studies| San Jose State University | San Jose, CA
