

Muhammad Bhatti

Senior Mobile Developer | Android | IOS | React Native | Flutter | Java/Kotlin/Swift/JS

Address Township of Monroe, New Jersey, USA

Phone (980) 415-1873

E-mail muhammadbhatti324@gmail.com

With over nine years of experience as a seasoned mobile app developer, I have consistently delivered excellence in crafting exceptional mobile applications. My expertise spans various industries, including Media and Entertainment, Financial Services, social media, Education, Baby Products, and Shoes. I specialize in Java, Kotlin, Android SDK, and React Native, enabling me to create innovative solutions for Android platforms. I am dedicated to delivering high-quality apps, emphasizing my profound understanding of UI/UX design, performance optimization, and data synchronization. As a collaborative team player, I am passionate about developing user-friendly mobile applications that surpass both client and end-user expectations. Proficient in core development tools, I combine problem-solving skills with meticulous attention to detail, ensuring the delivery of feature-rich, reliable, and visually appealing apps. Committed to staying abreast of mobile technology trends, I continuously enhance my skills to tackle new challenges in the dynamic world of mobile app development. My programming proficiency includes Java, Kotlin (for Android), Swift, Objective-C (for iOS), JavaScript, and Flutter (for cross-platform development).

Skills

Mobile Development Platforms: Android Studio (for Android), Xcode (for iOS), or cross-platform development tools like React Native, Flutter, or Xamarin.

User Interface (UI) Design: Ability to design visually appealing and user-friendly interfaces, understanding of Material Design (Android) or Human Interface Guidelines (iOS).

API Integration: Experience in integrating with RESTful APIs, third-party libraries, and web services for data exchange.

Database Management: Knowledge of working with local databases (e.g., SQLite) and cloud-based databases (e.g., Firebase, AWS).

Version Control/Git: Proficiency in using version control systems like Git for collaborative development and code management.

Testing and Debugging: Skill in testing, debugging, and performance optimization to ensure apps work smoothly.

Security: Understanding of mobile app security principles, encryption, and secure data storage.

Deployment: Experience in deploying apps to app stores (Google Play Store, Apple App Store) and knowledge of submission guidelines.

Work History

2022-01 - Current

Senior Mobile Application Architect (Android & IOS)

Contractor

- Lead the development of a feature-rich media streaming app with an unwavering commitment to elevating user experience and optimizing performance
- Employed a skillful blend of Java, Kotlin, Android SDK, Android Studio, Gradle, and XML
- Masterfully leveraged Android Jetpack components and embraced Material Design principles, resulting in an aesthetically modern, seamlessly navigable user interface that captivated users
- Implemented advanced multithreading strategies to finely tune app performance, achieving lightning-fast load times and flawlessly smooth video playback
- Orchestrated the meticulous management of app deployment and continuous updates on the Google Play Store, guaranteeing an ever-evolving, refined user journey
- Crafted a secure financial services app fortified with robust authentication and encryption features, meticulously sculpted with Java, Kotlin, and Android SDK
- Architected a scalable and easily maintainable app structure using Android Studio, Gradle, XML, and Android Jetpack, adaptable to the dynamic landscape of financial technology
- Expertly harnessed SQLite for streamlined data storage and management, ensuring users' seamless access to their financial information
- Fostered seamless synergy with backend developers to seamlessly integrate the app with Firebase services, paving the way for real-time data synchronization and timely updates for users.

2017-07 - 2021-12

Senior IOS and Android App Developer

Emblem Technologies

- Spearheaded the development of a wildly popular social media app that encapsulated an intuitive user interface and a rich tapestry of features
- Crafted with precision using Java, Kotlin, Android SDK, and Android Studio
- Imprinted the app with a distinctive character through the application of Material Design principles, Android Jetpack components, and XML, resulting

in user engagement that surpassed industry norms

- Seamlessly integrated Firebase services to facilitate user authentication, data storage, and real-time interactions, creating an ever-evolving and dynamic platform
- Diligently dedicated efforts to performance optimization and meticulous debugging, ensuring a responsive and uninterrupted user journey even in the face of surging demand
- Pioneered the creation of an innovative e-learning platform adorned with interactive content, quizzes, and meticulous progress tracking
- Expertly crafted with Java, Kotlin, Android SDK, and Android Studio
- Articulated a user-friendly and universally accessible interface, orchestrated through the harmonious blend of Android Jetpack, Material Design, and XML
- Navigated data management with finesse through the efficient handling of SQLite, creating a seamless bridge to remote server synchronization for uninterrupted access to educational treasures
- Vigorously pursued app performance optimization, diligently combatted debugging challenges, and orchestrated intricate multithreading techniques, ensuring an uninterrupted and enriching learning voyage for users.

2014-01 - 2017-01

Mobile Software Developer

Netsol Technologies

- Authored a comprehensive baby products shopping app, artfully curated with personalized recommendations and an intuitive, captivating UI
- A symphony of Java, Kotlin, Android SDK, and Android Studio
- Adhered to the gospel of Material Design principles, seamlessly incorporating Android Jetpack components and sculpting XML landscapes that invited users to explore
- Seamlessly wove the fabric of Firebase services into the app, creating a seamless tapestry for user authentication, data storage, and real-time updates, resulting in a profoundly enriched shopping sojourn
- Single-mindedly pursued app performance optimization, adeptly conquered debugging conundrums, and employed masterful multithreading, ensuring users always experienced a seamless shopping odyssey, even during peak traffic
- Crafted a magnificently enriched shoes shopping app, ensuring every step of the user's journey was a masterpiece
- Executed with finesse using Java, Kotlin, Android SDK, and Android Studio
- Painted a captivating, modern interface with the strokes of Material Design principles, Android Jetpack components, and XML, creating an immersive user experience
- Orchestrated SQLite's symphony for efficient data storage and management, affording users swift access to an extensive catalog of footwear
- Relentlessly optimized app performance, masterfully addressed debugging challenges, ensuring users always embarked on an enchanting shopping expedition.

Accomplishments

- Cross-Platform Development: Expertise in cross-platform frameworks (e.g., React Native, Flutter) for developing apps that work on multiple platforms
- Performance Optimization: Ability to optimize app performance, including memory management, efficient coding, and responsiveness
- Responsive Design: Knowledge of designing apps that adapt to various screen sizes and orientations
- User Experience (UX) Design: Understanding of UX principles to create apps that offer a seamless and intuitive user experience
- Push Notifications: Integration of push notification services to engage and retain users
- Backend Integration: Collaborating with backend developers to connect the app to server-side logic and databases
- Continuous Learning: Willingness to stay updated with the latest mobile technology trends and best practices
- Adaptability: Ability to adapt to evolving mobile platforms, devices, and development methodologies
- Problem Solving: Strong analytical and problem-solving skills to address technical challenges
- Project Management: Basic project management skills for managing timelines, tasks, and deliverables
- Communication: Effective communication and collaboration with cross-functional teams, including designers and QA testers.

Education

Bachelor of Science

University of New York
