

Neema Patel

Phone No: (314) 325-6279

Email ID: neemap4124@gmail.com

Green Card
Saint Louis, MO

PROFESSIONAL SUMMARY:

- Having **5+ years** of experience in working with programming language like **Java, J2EE, Struts, JDBC** Frameworks and **WebLogic** for deploying the web applications.
- Good experience in all stages of the Software Development Life Cycle (**SDLC**) from analysis, design, development, testing, implementation and maintenance.
- Experience in developing applications using **Java 5/6/7/8/9/10/11, J2EE Standards, Java Server Faces, EJB, JSP, Struts, Spring, JDBC, JMS, JNDI, XML, UML, Hibernate, Oracle, MVC Architecture, Web Services, AJAX, RMI, UML, HTML5, Java Beans, JavaScript** and **DHTML**.
- Proficient in programming by using the **IDE's** such as **Eclipse, My Eclipse, JBoss, RAD**.
- Expertise in **XML (SAX, DOM), XSL, XSLT, XML Schema, DTD, Custom Tags, and JavaScript**.
- Effectively created Table Functions, Indexes, Table Partitioning, Collections, Analytical functions, Materialized Views.
- Good knowledge on logical and physical Data Modeling and Created Tables, Views, Constraints, Index.
- Worked on **Oracle retail suite application** screen changes/ modification using **JavaScript, HTML5, Bootstrap** concepts.
- Developed Complex database objects like Stored Procedures, Functions, Packages and Triggers using **SQL** and **PL/SQL**.
- Good exposure and experience with **Service Oriented Architecture (SOA)** such as **Web Services** including **SOAP, WSDL, JMS (Java Messaging Service), AJAX** and tools like **ANT, Junit**.
- Experience in **SQL, PL/SQL** to write Stored Procedures, Functions, Triggers, Views and strong experience in **RDBMS** using **Oracle DB** and **NoSQL** database **Mongo DB**.
- Good knowledge in oracle data integration - **ODI, OSB, ELT, Hibernate** concepts.
- Worked extensively on Ref Cursor, External Tables, Collections and Exception handling.
- Good experience in **J2EE** application development using **Java, Servlets, JSP, EJB, JDBC, XML, Struts, Web services, Spring, Hibernate, JMS, MQ-Series, Soap, JAX-WS**.
- Good experience in creating new **JSP Pages**, generating **XML** and placing the **xml** in **IBM queue, RabbitMQ** for consumption.
- Handled operations and maintenance support for **AWS cloud resources which includes launching, maintaining and troubleshooting EC2 instances, S3 buckets, Auto Scaling, DynamoDB, AWS IAM, Elastic Load Balancers (ELB) and Relational Database Services (RDS)**
- Managed **AWS EC2 instances utilizing Auto Scaling, Elastic** load Balancing and glacier for our QA and UAT environments as well as infrastructure servers for GIT
- Excellent analytical, logical and programming skills, Self-Motivated, Self-Starter, and can work with minimal supervision with effective Communication skills and Organizational skills combined with attention and Time management skills.
- Willingness and Ability to learn and implement New Technologies wherever necessary. Proactive and well organized with effective time management skills.

TECHNICAL SUMMARY:

Languages	C, C++, Java 5/6/7/8/9/10/11, J2EE, JavaScript, SQL, PL/SQL
Java/J2EE Technologies	Servlets, JSP, JSTL, JDBC, JSF, MVC, XML, JAXP, DOM, JNDI, Web services
Design Tools	Rational Rose, Star UML, Enterprise Architect
Web Technologies	JavaScript, HTML5, XML, CSS3, Node.js
Frameworks	Spring, Spring-Data, Spring Boot, Spring JDBC, Hibernate, Spring Core, Spring ORM Spring AOP
Web/App Servers	Web Logic, Web Sphere, Apache Tomcat, JBOSS
Version Control Tools	GIT, SVN, CVS
Database	Oracle, DB2, SQL, MySQL, MongoDB
Operating Systems	Windows Variants, Mac, Linux, Unix

PROFESSIONAL EXPERIENCE:

Client: Ally Bank, Detroit, MI

Jun 2022 - PRESENT

Role: Java/J2EE Developer

Responsibilities:

- Followed agile methodology, interacted with the client, provide/take feedback on the features, suggest/implement optimal solutions and tailored application to customer needs.
- Implemented Business Logic using Java, Spring, Struts, and Hibernate.
- Integrated the application with Spring Framework for implementing Dependency Injection and provide abstraction between presentation layer and persistence layer.
- Implemented validation on the JSP fields using Struts Validation framework which included writing validation.xml and validation-rules.xml files.
- Developed Web pages using Struts view component JSP, JavaScript, HTML5, jQuery, AJAX, to create the user interface views Migration 3rd party applications.
- Used Log4j as a logging framework for the application and handled error, debug, warn messages.
- Supported all the UNIX requests for various applications and Developed ANT script to build .war and .ear files for the application.
- Developed unit test cases using Jasmine and Karma and performed end to end testing using Protractor and Selenium
- Utilized Amazon Web Services (AWS) EC2 to deploy Docker containers
- Experience in deploying the applications in AWS as EC2 instances and creating snapshots for the data that must be stored in AWS S3
- Used AWS SDK for connection to Amazon S3 buckets as it is used as the object storage service to store and retrieve the media files related to the application.
- Used Spring Boot with ORM Framework (Hibernate) to do CRUD operations with Database.
- Integrated Hibernate ORM framework with spring framework for data persistence and transaction management.
- Implemented Micro-services using AWS platform build upon spring boot services and enabled communication among different services using REST API
- Deployed my own code onto GIT Environment and applied some Hooks on automated process of Continuous Integration and continuous Deployment.CI and CD.
- Implemented Complex Business Delegate layer using DAO's created and business logic.
- Exposed various capabilities such as Web Services using Soap and WSDL.
- Worked on J2EE components like Servlets, JSPs and MDBs.
- Involved in preparing High- & low-level design docs with UML diagrams using Rational Rose tool.
- Used X fire to read the XML response coming from the web service.
- Configured and deployed the application on WebLogic Application Server.

- Created JUnit test cases, and Development of JUnit classes.
- Implemented all DAO's using Spring Framework. Implemented SOA using Web Services (SOA over WESB and SOAP over JMS) on ESB utilizing WebSphere Integration Developer (WID).
- Used Hibernate ORM framework as persistence engine, configured O/R mapping and wrote hibernate queries.
- Used MVC architecture, Business Delegate, Session facade, Data Access Object, Value Object and Singleton patterns.
- Involved in design and development of UI component, using frameworks JavaScript, HTML5, CSS3 and Bootstrap.
- Designed and integrated the full scale Hibernate / spring.
- Performed CRUD operations like Update, Insert and Delete data in NoSQL database like MongoDB.
- Used Spring IOC and spring's Hibernate Support, transaction management.
- Developed hibernate DAO framework with spring framework.
- Involved in all phases of the project from analysis and requirement phase to delivering the project. Designed the project using MVC, Session Façade, and Service Locator and Business Delegate patterns.

Environment: Java 9/10, J2EE, JavaScript, Hibernate, EJB, Springs,AWS, Struts, Eclipse IDE, WebLogic, jQuery, JSP, MVC, Rational Rose, HTML5, CSS3, XML, UML, Web Services, JUnit, SVN, MongoDB, Windows.

Client: Huntington Bank, Columbus, OH

May 2020 – May 2022

Role: Java/J2EE Developer

Responsibilities:

- Designed and developed the REST based Micro services using the Spring Boot, Spring Data with JPA.
- Implement OAuth tokenization for RESTful Webservices using Spring boot.
- Developed several controller classes as required for the design such as Abstract Wizard form controller, Simple Form controller, Multi Action controller, etc. in Spring MVC.
- Deployed and tested the application using Web logic application server.
- Involved in Analysis, Design, and Implementation of software applications using Java, J2EE, XML and XSLT and Web services (Soap, WSDL).
- Involved in the design activities from low to medium complex change requests and handled multiple high severity issues simultaneously.
- Data Operations were performed using Spring ORM wiring with Hibernate and Implemented Hibernate Template and criteria API for Querying database.
- Involved java multithreading to cascade multiple changes on multiple records in only one transaction and developed a batch process framework.
- Experience in Integration of Amazon Web Services AWS with other applications infrastructure.
- Involved in the design of the user interfaces using Java Swing and Sun Studio.
- Experience in UNIX/Linux shell scripts for data-driven automatic processing Selecting the appropriate AWS service based on compute, data, or security requirements
- Involved in the design of the user interfaces using Java Swing and Sun Studio
- Developed Hibernate persistence layer modules using EJB Java Persistence API (JPA) annotations and Entity Manager
- Experience in Integration of Amazon Web Services AWS with other applications infrastructure.
- Developed web application using JSP custom tag libraries, Struts Action classes and Action. Designed Java Servlets and Objects using J2EE standards.
- Developed a prototype of the application and demonstrated to business users to verify the application functionality.

- Developed middle-tier application with J2EE using Servlet, EJB, Java Beans and Web Services Standards (Soap, WSDL, UDDI).
- Implemented J2EE design patterns like Singleton and Session Façade.
- Developed Façade classes to encapsulate the business logic and hide the implementation details of the data access classes and EJBs.
- Configured the application using Spring framework annotations and developed Spring Controllers for request and response processing and implemented RESTful Web Service.
- Migrated Spring based application to cloud based Micro services.
- Developed Hibernate persistence layer modules using EJB Java Persistence API (JPA) annotations and Entity Manager.
- Participated in coding Spring AOP components for the Transactional Model to handle many requests.
- Designed various tables required for the project in Oracle database and used the Stored Procedures in the application.
- Wrote and debugged the ANT Scripts for building the entire web application.
- Developed DAOs (Data Access Object) using Hibernate as ORM to interact with DBMS – Oracle.
- Created XML Schema, XML template and used XML SAX/DOM API to parse them.
- Applied J2EE design patterns like Business Delegate, DAO, and Singleton etc.
- Developed several Java Swing custom components to address the core business.
- Developed User Interface having animations and effects using JSF, JavaScript and HTML5.
- Designed, developed and maintained the data layer using Hibernate and performed configuration of Struts Application Framework.
- Used Log4j for External Configuration Files and debugging.

Environment: Java SE 7/8, JavaScript, Hibernate, Servlets, Spring, JAXB, XSL, XSD, Swing, AWT, JNI, JFC, ANT, AJAX, MVC, HTML5, XML, CSS3, Eclipse, JUnit, JTS, Unix, Oracle, Windows.

Client: CVS Caremark, Scottsdale, AZ

Mar 2018 – Apr 2020

Role: Java/J2EE Developer

Responsibilities:

- Developed the Web Interface using Struts, HTML5, CSS3 and JavaScript.
- Used JavaScript for the web page validation and Struts validator for server-side validation of data.
- Designed the applications using Struts MVC framework for easy maintainability.
- Involved in developing business tier using stateless session bean (acts as a Session Facade) and Message driven beans.
- Used JDBC and Hibernate to connect to the database.
- Hibernate was used to Map relational data directly to java objects.
- Developed Action Classes, Action Form Classes, created JSPs using Struts tag libraries and configured in Struts-config.xml, Web.xml files.
- Created tile definitions, Struts-config files, validation files and resource bundles for all modules using Struts framework.
- Experience in UNIX/Linux shell scripts for data-driven automatic processing Selecting the appropriate AWS service based on compute, data, or security requirements
- Involved in the design of the user interfaces using Java Swing and Sun Studio
- Developed Hibernate persistence layer modules using EJB Java Persistence API (JPA) annotations and Entity Manager
- Experience in Integration of Amazon Web Services AWS with other applications infrastructure.
- Developed form classes of Struts Framework to write the routing logic and to call different services.
- Used the Struts controller component classes for developing the applications and used the struts

application resources properties file for error codes, views labels and for Product Internationalization.

- Involved in peer code reviews and performed integration testing of the modules.
- Followed coding and documentation standards.
- Involved in full Software Development Life Cycle, Requirements, design, development, testing, deployment and maintenance of the application. Developed the class and sequence diagrams using MS Visio.
- Implemented various J2EE design patterns for designing this application.
- Used agile practices for development and gained significant experience in spring.
- Developed Servlets at server side for handling requests and responses from the web page and back-end java classes.
- Used Eclipse as IDE for development.
- JavaBeans were used to store in a number of different collections of "attributes". Each collection has different rules for the lifetime of that collection, and the visibility of the beans stored there. The Java Server Pages (JSP) Specification defines scope choices.

Environment: Java SE 7, J2EE, Hibernate, Servlets, JSP, Spring, MVC, AWS, Eclipse IDE, Maven, JSTL, JMS, XML, JAXB, Soap, ANT, SQL, Oracle, Windows.
