Professional Summary

Principal BI & Data Architect with 15+ years of experience designing and delivering cloud-native BI and analytics platforms across AWS, Azure, and GCP.

Proven expertise in Snowflake, Databricks, Tableau, Power BI, and data governance frameworks. Adept at leading enterprise migrations, real-time analytics, and AI/ML integration, while aligning solutions with business outcomes. Skilled in stakeholder engagement, solution delivery, and mentoring high-impact teams.

Work Experience

Principal Solutions Architect - BI Data & Analytics

Merkle a Dentsu Company

January 2022 to Present

- Ultimately responsible for the solution, design and architecture of BI Solutions
- Architect and Design: Lead the design and architecture of data solutions using Azure Databricks, Collibra, Tableau, PowerBI, Snowflake, GCP, and other cloud platforms
- Data Modelling: Develop and implement data models that support business intelligence tools such as Power BI, Cognos, and Tableau.
- Data Pipeline Creation: Utilize cloud-based tools to create, manage, and optimize data pipelines for high-volume production systems.
- Programming: Use programming languages such as SQL, Python, and R to access, transform, and analyse data.
- Databricks Workflow Deployment: Deploy and manage Databricks notebooks and workflows to streamline data processing and analytics.
- Agile Collaboration: Work in an Agile environment, collaborating with cross-functional teams to iteratively develop and deliver data products.
- Performance Optimization: Continuously optimize data pipeline performance to ensure efficiency and reliability in data processing.
- BI Development: Develop and maintain Power BI data models, ensuring they meet business requirements and performance standards.
- Innovate with new tools and techniques to enhance client outcomes.
- Ensure robust, scalable solutions aligned with future needs and enhancements.
- Adhere to data industry best practices and methodology for performing day to day admin duties including but not limited to Tableau and other BI tools deployments, upgrades, configurations, optimisations, fine tuning, migrations (cloud to on-prem and vice versa)
- Lead analysis of requirements, development, and implementation of technical components of data and analytics projects
- Design and implemented a scalable data warehouse architecture to support the organization's growing data needs
- Perform capacity planning and scalability assessments to ensure the cloud-based data infrastructure can handle future growth and increased workloads

Principal Data Architect - BI, Data & Analytics

Merkle (a Dentsu Company)

January 2021 to October 2025

- Designed enterprise BI and analytics solutions across Azure, GCP, and hybrid environments.
- Architected Snowflake + Databricks platforms reducing reporting latency by 40%.
- Implemented Tableau/Power BI governance (CI/CD, version control, performance tuning).
- Automated data workflows using Spark + Python, cutting prep time by 50%.
- Delivered solution demos, PoCs, RFP responses with 75% win rate; helped close \$5M+ in business.

Sr. Data & Analytics Architect

Apple

January 2021 to January 2022

- Led team of 18 in handling complex and/or escalated service issues and claims with heavy focus on communication with customers, clients, affiliates, vendors and other departments.
- Deployed, maintained, configured and patched all linux and windows servers for application update include upgrades and patches (world's largest deployment of Tableau External File store and repository)
- Led, defined and implemented end-to-end modern data platforms on cloud platforms using 1st party services in support of analytics and AI use cases
- Designed and Drove reusable assets, growing Analytics and DevOps capability
- Solutioned & Delivered Modern Data Platforms and Advanced Analytics solutions for clients
- Collaborated with enterprise architects, data architects, ETL developers & engineers, data scientists, and information designers to lead the identification and definition of required data structures, formats, pipelines, metadata, and workload orchestration capabilities
- Addressed aspects such as data privacy & security, data ingestion & processing, data storage & compute, analytical & operational consumption, data modelling, data virtualization, self-service data preparation & analytics, AI enablement, and API integrations
- Technical liaison between customers and engineering teams
- Data evangelist by educating a variety of customers on the value of cloud and data service

Sr. Data & Analytics Architect

Apple

January 2018 to January 2021

- Migrated data platforms to AWS Redshift reducing latency by 35% and costs by 20%.
- Led 18-member team on enterprise data warehouse consolidation (SSIS, SQL, PostgreSQL).
- Built real-time analytics pipelines on Azure Synapse + Databricks.
- Delivered executive dashboards in Tableau & Power BI (20% reporting efficiency gain).

Sr. Business Intelligence Team Lead Expert

CitiBank

January 2018 to January 2021

- Led team of 5 in Installation, configuration, maintenance and upgrading of Tableau server environments (supporting 9 environments, 30k+ users).
- Provided training to new and existing users, creating center of excellence for BI

- Helped end-users by setting guidelines and incorporating best practices for golden data layers in data sets, data optimization, and prototypes.

Escalation Technical Account Manager

Tableau (Salesforce)

November 2013 to January 2018

(2017-2018)

- Handled escalations for top 100 enterprise customers, ensuring SLA compliance.

Escalation Technical Account Manager

Tableau

November 2013 to January 2018

- (01/17 -01/18)

- Participated and lead Hot Account Call and Hot Defect meetings for top 100 premium customers
- Ensured customer and Sales satisfaction is met before an account is "cooled"
- Identified possible escalated cases and accounts and delegate to new team members to develop an action plan around the issue.

Solutions Engineer - Deployment & Implementation

Tableau

December 2014 to December 2016

- Drove all aspects of successful Tableau deployments from requirements and design to training and delivery.
- Designed whitepapers for customer based on their specific needs.
- Developed strong ability to quickly learn and comprehend business processes and problems in order to effectively develop business reports and visualizations.

Sr. Tableau Server Engineer

AWS

January 2013 to December 2014

- Administered 20,000+ Tableau server upgrades across Windows, AWS, Azure.

Sr. Tableau Server Engineer

Tableau

November 2013 to November 2014

- Extensive Tableau Server admin duties, including but not limited to:
Configuring, upgrading, assigning permissions, creating sites, users, data governance.
- Deployed and provisioned 10,000+ environments (Windows, AWS, MS Azure, etc.).
- Upgraded over 20,000+ Tableau Servers on Windows, VMs, AWS, Azure etc.

Microsoft

Fabric Solutions Engineer

Microsoft Azure

September 2009 to November 2013

- Led cloud migration projects, improving uptime and reducing costs.
- Partnered with dev teams to deliver secure cloud-native BI solutions.

Azure / Fabric Solutions Engineer

Microsoft

September 2009 to November 2013

- Designed and implemented scalable Azure cloud solutions for clients, ensuring high availability and performance
- Led a team of 12 cloud engineers in the successful migration of on-premises infrastructure to the cloud, reducing operational costs
- Developed architectural blueprints and documentation for Azure-based applications, outlining key components and integration points
- Collaborated with cross-functional teams to gather requirements, define project scope, and create technical specifications for Azure cloud projects

Solutions Architect

Education

Information Technology (B.Sc.)

American InterContinental University

Information Technology (Bachelor of Information Technology)

American InterContinental University

January 2010 to December 2010

Bachelor of Arts

Doctoral degree

Doctor of Philosophy

Bachelor of Science

Master's degree

Computer Information Systems (Bachelor's degree)
