Work Experience

Senior Business Analyst (Consultant)

TD Bank

December 2022 to May 2023

Consulted in the wealth division at TD Bank, focusing on the bank's advisory/planning platform and on the workflows associated with the trading of structured products.

Served as a business analyst on a project team responsible for enterprise-wide integration activities.

Conducted requirements elicitation and managed the requirements lifecycle.

Performed business process analysis with an emphasis on gap analysis.

Produced business analysis artifacts, including use cases, process diagrams, business requirements and user stories.

Senior Business Analyst (Consultant)

First Republic Bank

April 2022 to November 2022

Served as a business analyst on an Agile team that develops new systems for the bank's treasury management division.

Gathered requirements from the business and translated them into user stories and acceptance criteria for development and QA.

Documented use cases, process flows and business requirements.

Senior Business Analyst (Consultant)

Wells Fargo

September 2021 to February 2022

Served as a product owner on an Agile team that supports and develops critical systems for the bank's commercial banking business.

Gathered requirements from the business and translated them into user stories and acceptance criteria for development and QA.

Led a team of 10 developers and QA staff.

Senior Business Analyst (Consultant)

Dodge & Cox

August 2019 to July 2021

Consulted in the Business Integrations group at Dodge & Cox.

Contributed to the development of the company's data analytics and business intelligence functions.

Elicited requirements by conducting stakeholder interviews and requirements workshops. Provided data, process and gap analyses.

Created and managed project roadmap for multiple Agile projects, including task formulation and coordination.

Assisted in a data management capacity by defining and mapping data elements and developing transformation logic.

Documented use cases, process flows, business requirements, business rules, functional specifications, test plans and user guides.

Senior Business Analyst (Consultant)

Franklin Templeton

April 2017 to March 2018

Consulted in the data management group at Franklin Templeton Investments.

Contributed to ETF product launches, including the sourcing of data from reference and market data vendors and the configuration of data feeds.

Provided data analysis for ETF reporting, both internally for risk management purposes and externally for investors.

Wrote use cases, data mapping documents and test case scenarios in support of the development of new features and the integration of new systems.

Lead Business Analyst

SmartStream Technologies

June 2014 to December 2016

Led the effort to establish a data governance and methodology function for

SmartStream's Reference Data Utility (RDU). Designed and implemented the processes and workflows now used by the organization.

Fielded and researched data governance and data methodology issues. Wrote methodology documents and conducted methodology forums.

Served as a subject matter expert for SmartStream's derivatives business.

Maintained a deep business and technology understanding of the RDU. Contributed to system design, both the data model and the UI.

Interacted and collaborated with senior management, both internally and externally.

Senior Business Analyst

Advent Software

September 2004 to May 2014

May 2010 - May 2014

Provided analysis and ensured data integrity of capital markets data for Advent

OnDemand, a back-office portfolio management service, including security setup, detailed security information, pricing, classification, ratings and corporate actions.

Contributed to the development of software tools to check and correct market and reference data, primarily through SQL scripts and reports.

Maintained a deep understanding of Advent OnDemand service levels, functionality and technical architecture.

Worked with Data Analyst and Tech Analyst teams to identify, define and develop automated data solutions and workflows.

Business Analyst

Avent Software - San Francisco, CA

May 2008 to April 2010

Provided resolution for inquiries and issues received from internal teams (i.e. portfolio accounting, data conversion, client support and implementation).

Provided resolution for client inquiries and issues received via the CRM system.

Assisted in the writing of policies and procedures documentation.

Assisted in identifying automation needs and documenting for technology group.

Used all productivity tools available within Advent in resolution of internal and external data issues.

Associate Application Engineer

Avent Software - San Francisco, CA

September 2004 to April 2008

Provided technical and business support to clients of AdvisorMart.com, an online portfolio management system.

Partnered with custodial organizations and data providers to ensure accuracy of investment data for Advent clients.

Applied data integrity tests to production databases and ran correcting SQL scripts.

Participated in systems analysis and design, including development of product functional specifications and use.

Troubleshooted and documented software bugs for purposes of improving current processes. Prioritized bugs and expedited fixes for high priority bugs.

Participated in validation of development projects. Assisted in determining high-level functional test cases for QA

Business Systems Analyst

(Consultant)

July 2002 to August 2004

Enterprise systems evaluation, solution design, deployment and troubleshooting.

Managed end-to-end implementation of financial, accounting and operations management systems.

Trained employees in systems use and designated functional roles within new operational flows.

Proposed and executed projects according to senior management directives.

Product Manager

x.com/PayPal

June 2000 to June 2002

As a technical product manager led the effort to develop strategies to reconcile all of PayPal's settlement activity.

Managed rollout and systems modification of reconciliation software and processes.

Served as single point of contact for vendors involved in the project. Acted as liaison to software developers, database administrators and IT department.

Communicated how new product features would affect other groups and the organization as a whole.

Operations Specialist

Mastech

December 1996 to May 2000

Worked in the capital markets divisions of major brokerage and asset management firms, including BA Investment Services and Barclays Global Investors.

Applied corporate actions to security loan positions. Collected coupon bond payments from counterparties.

Conducted portfolio accounting and reporting for multi-asset investment portfolios.

Reconciled and balanced omnibus money market accounts.

Education

Master in Business Administration

San Francisco State University

Bachelor in Mathematics and Philosophy

St. John's College
