

RajKiran B
Business Analyst/Product Owner
bharath@izealinc.com
[571-223-7719](tel:571-223-7719)

Professional Summary

- **12** years of experience in supply chain and banking industry across different verticals viz., Business Analyst, Trade Finance, Forex, KYC/AML, Retail Banking Asset & Liabilities, Cards with projects in the Financial Services/Banking space.
- Worked on banking projects across various departments including Trade Finance, Retail Operations, Regulatory, Legal, Compliance, IT, etc.
- Knowledge in Software development life cycle (SDLC) methodologies like Waterfall Model, Agile Methodology.
- Analyze the Business needs in detail, interview key stakeholders & define functional and non-functional requirements.
- Conducted Scope/Impact Analysis on Business Processes using techniques such as use case diagrams(UML), Context Diagram (Data Flow Modeling), BPMN (process modeling), and Flow charts using MS Visio and Draw.io.
- Provide the information to Developer/ testing team on interfaces and user stories.
- Good Working exposure in DBMS, SQL, Snow sight, Analytical and problem solving.
- Experience in writing SQL Queries and basic python.
- Good Domain Knowledge in Banking **Payments, Trade Finance, UCP600, Swift Messages, Cards and Supply chain.**
- Successful at developing strong client relationships and Support team in achieving the budgets with proper sales pitch.
- Experienced in International/ Domestic Letter of Credit, Import/ Export, OFAC-Sanctions, Supplier's Credit documentation/ negotiation, Bank Guarantees, Inward/ Outward Remittances, Swift Messaging, Forward Contracts, Capital Account Transaction, RBI Master Direction &Fema Regulations, Digital Banking Products, Account Opening, KYC/AML Retail Banking Assets & Liabilities, compliance, and processing of transactions.
- Excellent in managing and optimizing various aspects of supply chain management.
- Possess excellent interpersonal, leadership skills, communication, and analytical skills with demonstrated abilities in customer relationship management.
- Aresult-orientedpersonwithastronganalyticalmindsetandanever-endingzealtolearn&excel.
- Strong exposure in store and process credit card / Debit Card accounts and process transactions (Visa, MasterCard, American Express, Euro pays, private label transactions). Having strong domain knowledge in application catering to banking/Credit cards / mortgage business. Familiar with the full life cycle of credit cards applications for different banking systems. Have strong knowledge in following phases of credit cards life cycle.

Certifications

Certified SnowPro Core – Snowflake

Certified CBAP - IGC

Skills

Database Specialties	Database Architecture, Data Analysis, Database Design and Modeling, Data Mining, Data Profiling, Data Warehouse
System Analysis	User Requirement Gathering, JAD Sessions, User Requirement Analysis, Gap Analysis, Data Cleansing, Data Transformations, Data Relationships, Source Systems Analysis and Reporting Analysis

Data Modeling Tools	Toad, MS-Visio
Reporting Tools	Business Objects, Power BI, Peoplesoft
Programming Languages	SQL, SnowSql,Python
Databases	Oracle, SQL Server, Snowflake
Web technologies	HTML, DHTML, XML

Work Experience

Citi Bank, VA

Sep 2022 to Till Date

BusinessAnalyst

- Gathered business Requirements by conducting detailed interview with Business Users, stakeholders and identified end-to-end process.
- Experienced with Snowflake Cloud Database.
- Prepared business requirement documents and translated business requirement into functional specification
- Well-versed in Requirement Elicitation & Prioritization, Scope Definition, Gap Analysis, Stakeholder Management, Sprint Planning, Sprint Review, Product Backlog Management, and Change Request Management.
- Developed, executed, and documented detailed design program specifications for PeopleSoft HCM and EPM applications.
- Analyzed complex business processes from a quality management perspective to design a set of To-be business processes for the payments team, which acted as part of the TOM (Target Operating Model).
- Worked on Data Migration Project from Standard MS SQL & Oracle Platforms to AWS Cloud & Snowflake Cloud Platforms.
- Collaborate with cross-functional teams, including logistics, operations, and finance, to ensure alignment and effective communication across different departments.
- Designed and implemented data warehousing solutions using Snowflake, optimizing data storage and retrieval for clients.
- Implemented and improved the current functionality to automated interfaces with internal And external systems into Peoplesoft financial applications.
- Monitoring of collateral and margin payments in multiple accounts for intraday liquidity and funding.
- Created SSIS ETL packages to attach the letters to its respective events by extracting data from different sources and loading to the different destinations such as SQL server, flat file and excel file.
- Created Business Requirement Document (BRD) and Functional Specification Document (FSD) for the project. Identified the Use Cases and documented the product requirements and the workflows of the As-Is process and the To-Be process in the textual Use Cases for various modules like Loan Mod, CRM, Reporting, Dashboard etc.
- Performed functional testing and assisted LOB in UAT.
- Provided recommendations on PeopleSoft functionalities that are not utilized and demonstrated how it will improve their business process.
- Dealt in implementation and troubleshooting of Fed wire and ACH payments.
- Developed SQL queries to support reporting and analytics requirements.
- Ensure that the process complies with organizational policies, standards, and regulatory requirements.
- Effective data management to changing business needs technological advancements, regulatory requirements and ensuring data integrity, and maintaining compliance.
- Generate reports according to the business requirements using SQL Server Reporting
- Service (SSRS) and populate data warehouse using SQL Server Integration Service
- (SSIS).

- Collaborate with stakeholders to identify and document business requirements for data analysis and reporting. They work closely with teams to understand the specific data needs and translate those requirements into actionable insights using Power BI.
- Defined UX/UI functional requirements as User Stories in JIRA and Confluence. Planned and conducted user acceptance testing.
- Assisted ETL development done using Data Stage and report development using Cognos.
- Have good experience in wireframes and prototypes for designing UI/Ux.
- Conduct Requirements Gathering sessions with the use of Content Data Modelling.
- Update documentation, such as process maps, user guides, and logistics and system manuals.
- Created test file payments for internal testing of requirements for payment delivery methods and message formats.
- Created penalty report wireframes and prototypes for various Asset Management Clients and reviewed the same with Business stakeholders for Business approvals. Closely worked with Report development Teams to ensure the Business requirements are reflected accurately during report development
- Collaborate with stakeholders to understand the specific requirements and challenges within the supply chain. They gather insights into the supply chain processes, including procurement, production, inventory management, and distribution, to identify areas for improvement and optimization.
- Developed reports using Cognos Report Studio for airline metrics and provided troubleshooting and maintenance support.
- Manage data governance policies and security measures within Power BI to safeguard sensitive information and ensure compliance with data protection regulations.
- Knowledge in Retail Banking Operations such as CRM operations, Banker Incentives, Account Opening and Maintenance, ATM Card Processing, Card Management and Authorization.
- Contribute to inventory and warehouse management within the ERP system.
- Resolution of BAI, MT940 and MT942 file transfer issues and high value time-sensitive payments.
- Strong exposure in store and process credit card / Debit Card accounts and process transactions (Visa, MasterCard, American Express, Euro pays, private label transactions). Having strong domain knowledge in application catering to banking/Credit cards / mortgage business. Familiar with the full life cycle of credit cards applications for different banking systems. Have strong knowledge in following phases of credit cards life cycle.
- Used BI tools to create visual representations of data, such as charts, graphs, and heatmaps, to present complex information in a clear and understandable format.
- Experience in processing Change Requests and analyzing the impact of change, creating the impact analysis report and processing it through the Change Control Board (CCB).
- Ensure the smooth integration of data from various supply chain processes into the ERP system.
- Ability to organize, document and track changes and defects by using Rational Requisite Pro, Clear Quest, Clear Case and Jira.
- Create, maintain, and update Power BI reports and dashboards based on evolving business needs.
- Responsible for preparing and modeling data with Power BI.
- Collaborate with cross-functional teams to oversee the implementation and configuration of ERP systems tailored to supply chain management.
- Created BRD, FRD using JAD sessions and used UML for Business Process Modeling, Use Cases, logistics, Activity Diagrams, Wireframe prototypes and documenting them using Microsoft Visio.
- Gathered data warehouse requirements from business users.
- Knowledge in the ETL (Extract, Transform and Load) of data into a data warehouse/data mart and Business Intelligence (BI) tools like Business Objects Modules (Reporter, Supervisor, Designer, and Web Intelligence).

BusinessAnalyst

- Collaborated with stakeholders to elicit, analyze, and document business requirements for Supply chain systems and processes.
- Well-versed in Requirement Elicitation & Prioritization, Scope Definition, Gap Analysis, Stakeholder Management, Sprint Planning, Sprint Review, Product Backlog Management, and Change Request Management.
- Work on Database Architecture & Migration Project in AWS/ Snowflake Platforms.
- Conducted thorough analysis of existing systems, identified inefficiencies, and recommended process improvements to streamline trade operations.
- Developed complex stored procedures using T-SQL to generate Ad hoc reports within SQL Server Reporting Service (SSRS).
- Developed PeopleSoft HCM/EPM custom application objects using Application Designer in PeopleTools. Modified existing records, pages, components and menus per user requirements.
- Designed a Change Strategy by analyzing AS-IS and TO-BE states and performing Gap Analysis.
- Effective communication and collaboration to ensure a smooth ALM process and successful application delivery.
- Captured and expressed requirements with BDD-style specifications, Gherkin user stories, user cases and mockups to ensure smooth agile process.
- Managed business continuity plan, Payments, failovers, disaster recover drills and test run.
- Developed User Stories and Acceptance Criteria using Gherkin syntax.
- Worked as a part of scrum team, in an agile methodology with sprint cycles, daily stand ups, grooming of user stories and defining the user acceptance criteria.
- Build and maintain SQL scripts, indexes, and complex queries for data analysis and extraction.
- Develop and recommend process enhancements to streamline Trade finance operations and reduce processing time and costs.
- Worked closely with IT teams to translate business requirements into technical specifications and participated in the design and development of system enhancements.
- Used Power BI to perform data analysis, explore trends, and create insightful visualizations such as charts, graphs, and interactive dashboards.
- Met customer needs by creating custom reports, editing existing reports, and scheduling reports with PeopleSoft reporting tool and calculation fields.
- Assisted in the testing and quality assurance processes, including user acceptance testing (UAT).
- Conducted training sessions for end-users to ensure a smooth transition to new systems and processes.
- Facilitated communication between business users and IT teams to ensure the successful delivery of projects.
- Acted as a bridge between the IT department and business clients, overseeing the collection, analysis, review, and documentation of business needs and requirements.
- Collaborate with cross-functional teams, including data engineers, data scientists, and business stakeholders, to ensure that the data model meets the needs of various departments within the organization.
- Analyze requirements from stakeholders to understand the business needs and objectives related to data modeling.
- Effective data management to changing business needs, technological advancements, regulatory requirements and ensuring data integrity, and maintaining compliance.
- Successfully worked with and managed third-party vendors and consultants, ensuring the delivery of high-quality outcomes.
- Gathered clear and unambiguous requirements to establish a rules-based expert system for faster under writing decisions.
- Played a key role in defining source-to-target data mappings, business rules, and data definitions, collaborating with internal architects on data architectures.

- Planned and coordinated system releases, ensuring alignment between business, technology, and infrastructure teams.

Polaris, Intellect Design-India

July 2017 to August 2018

Business Analyst

- Gathering detailed requirements by conducting interviews, workshops, and surveys by analyzing existing business processes.
- Collaborate with technical teams to design the solution, Facilitate communication between various stakeholders, SME.
- Collaborate with quality assurance and testing teams to plan and coordinate testing activities related to the change request.
- Effective communication and collaboration to ensure a smooth ALM process and successful application delivery.
- Wrote SQL queries to perform Data Validation and Data Integrity testing.
- Delivered appropriate elaborated user stories and acceptance criteria to drive software solutions.
- Well-versed in Requirement Elicitation & Prioritization, Scope Definition, Gap Analysis, Stakeholder Management, Sprint Planning, Sprint Review, Product Backlog Management, and Change Request Management.
- Have good experience in wireframes and prototypes for designing UI/UX.
- Update documentation, such as process maps, user guides, and system manuals.
- Conducted an Induction and Training Program for new teams and business users on the product and upgraded automated application.
- Define the level of traceability to be adapted in the project, working closely with Business Users to formulate and document Business Requirements.
- Analyzed Specification by defining mapping Rules (Simple and Complex) and complete Business Process Mapping, Monitor Test Scenarios conducted by system developers.
- Ensured that the solution meets the expectations within the constraints of the Business Case in terms of quality, functionality, and ease of use.
- Translate SME requirements into well-defined requirements, establishing priority, and identifying resource requirements.

Infosys-India

June 2014 to June 2017

Business Analyst

- Conducted in-depth analysis of Trade Finance processes and systems, identifying opportunities for optimization and efficiency improvements.
- Collaborated with senior analysts to analyze Trade finance data and generate actionable insights.
- Identify potential risks and challenges associated with integration, such as data security concerns, data consistency issues, or system compatibility problems.
- Define test cases and scenarios for integration testing.
- Worked on seller provision fund origination and maintenance of credit files according to federal banking guidelines.
- Created a high level BRD (Business Requirements Document) to document the business need and create estimates for each requirement.
- Created FRD (Functional Requirements Document) with detailed mock-ups and wireframes for the requirements selected for the release.
- Worked on US & CA payroll & Tax integration for vendors and clients.
- Captured the banks business requisites and translated it into data and made sure It aligned with the data engineering team to consolidate into the already existing systems using SQL.
- Provide training and support to end-users and ensure that users understand how to use the integrated

applications effectively.

Newgen Software -India
Business Analyst

Sep 2010 to May 2014

- Assisted senior analysts in gathering and documenting business requirements for retail banking projects.
- Assisted in the preparation of documentation related to compliance and regulatory audits.
- Conducted in-depth analysis of existing banking systems, processes, and workflows to identify areas for improvement.
- Liaison between business users and IT teams, ensuring effective communication and alignment of project goals.
- Facilitated user acceptance testing (UAT).
- Developed BRD, FRD, Activity flow, Business process flow and Use cases.
- The project heads towards enhancing the existing online banking application by improving its GUI, making it user-friendly.
- Application was developed for Online Banking accessing personal accounts, checking balances, payment of recurring bills, such as mortgages and loan payments, transfer of funds between accounts of its customers.
- Performed extensive Vendor Management. For example, managing Oracle EBS Financials and relationships with third party Oracle partners.
- Collaborated with Front Office team for suspicious activity reports on KYC/ AML for flagged accounts to assist business unit and prevent operational and reputational risks.
- Investigated, researched, analyzed, and assessed AML risks in procedures, processes, and proposed business changes.

Education

Bachelor of Technology in Computer Science & Engineering - 2007
