PROFESSION SUMMARY

- Data Analyst and Business Insights Specialist with 4+ years of experience who enjoys transforming complex business problems through quantitative analytics, statistical modeling, and data visualization techniques in a fast-paced environment.
- I crunch data using tools like SQL, R, Python, and MS Excel to generate valuable insights using Tableau, Power BI, QlikView and Looker.
- Proficient in uncovering trends and patterns within large-scale datasets through Data Mining, Forecasting, and Reporting techniques
- Experience working with leadership folks of Fortune 100 companies and partnering with cross-functional teams spanning multiple geographies including stakeholders at all levels in Marketing, Sales, Finance, Data Science and Customer Experience teams.
- Detail-oriented, critical thinker and analytical problem-solving abilities with strong verbal and written communication skills at all levels.

EDUCATION

California State University- Fullerton, CA

Aug 2017- May 2019

Master of Science in Information Systems (Business Analytics)

L. J. Institute of Engineering and Technology- Ahmedabad, IN

Aug 2013- Jun 2017

Bachelor of Technology in Computer Engineering

TECHNICAL SKILLS

Data Languages: SQL, Advanced Excel (VBA, pivot tables, array, power pivots), Python, R.

Project Management Tools: JIRA, Confluence, KANBAN, Asana.

Data Mining Algorithms: Funnel Analysis, A/B Testing, Random Forest, Clustering, time-series analysis, Factor analysis, Regression.

Data Visualization: Tableau, QlikView, Power BI, Micro-strategy, Looker, Quick Sight, Alteryx, Microsoft Office (Excel, PowerPoint, Access).

PROFESSION EXPERIENCE

HP Inc.

Feb 2022- Oct 2023

Data Analyst III

- Conducted comprehensive data analysis on various projects using SQL and advanced Excel functions to extract and manipulate large datasets used to identify business, operational, and financial metrics leading to 8% increase in key business metrics.
- Leading SMB (Small Medium Business) project for HP+ to understand business requirements from stakeholders and translate them into actionable insights with analysis to executive leadership to inform strategic decision-making.
- Implementing Power BI for automated dashboard reporting, leading 75% reduction in manual processing time from 8 hours to 2 hours, enabling real-time monitoring of KPIs and performance metrics.
- Drive design of ETL processes to fetch and integrate data from diverse sources using SQL used to build automated dashboards using Power BI.
- Collaborated on A/B initiatives, resulting in an impressive 11-point increase in user engagement through design variation analysis.
- Develop automated dashboards to bring attention to emerging trends and anomalies data signals across various KPIs of data using Tableau.
- Collaborate with cross-functional teams to identify and address data quality issues and discrepancies for the seamless data flows.

UnitedHealth Group- La Palma, CA

Aug 2019- Jan 2022

Data Analyst

- Designed complex SQL queries for extensive datasets used for KPI business metrics, and ability to understand and analyze the moving pieces of statistical model, reducing processing time by 40% and enhancing productivity by 30%.
- Assisted in creation and optimization of dashboards, providing stakeholders with real-time insights into key performance metrics using Power BI.
- Utilized Tableau to integrate end-to-end analysis into a report with presentations to extract insights with daily, weekly, and monthly reports.
- Apply statistical techniques with SQL and Excel in developing models for customer behavior, encompassing product preference and subscriptions, using both structured and unstructured healthcare provider and customer data.
- Conducted ad-hoc data analysis requests to support various departments including marketing, sales, product, IT and operations.

Social Science Research Center- Fullerton, CA

Feb 2018- Aug 2018

Research Assistant

- Build dashboard reports on Community college data with analysis using SQL to identify admission trends, dropout rate and employment rate.
- Performed geospatial data analysis on Cal optima data for market expansion, improving services and reduce response time for future projects.
- Created reports on different department data to better understand the usage and facilities patterns in the different counties using Power BI.

PROJECTS

Small Medium Business Analytics Project

Aug 2022- Oct 2023

- Lead with designing, developing, and maintaining automated dashboards with ETL process for data that help translate analytics insights into concrete, actionable recommendations for business product improvements using SQL, Excel and Power BI.

Data Analytics Project

Jan 2023- Mar 2023

- Performed analysis and derived insights using data driven approach and look at trends and patterns that helped the data integrity with KPI for metrics identify sales patterns, conversion funnel progress, and customer sentiment using Excel, Tableau and SQL.
