

Sruthi

Data Analyst | sruthi17v@gmail.com | (484) 306-3973

PROFESSIONAL SUMMARY

- Around 7 years of IT experience in the field of **Business/Data analysis, ETL Development, SQL Relational Database Querying, Data Modeling, Data interpretation, Data Visualization** and Project Management.
- Strong experience in Business and **Data Analysis, Data Profiling, Data Migration**, Data Quality, Data Integration, and Metadata Management Services and Configuration Management.
- Over 2+ years of experience in Data Modeling with expertise in creating **Star & Snow-Flake Schemas**, FACT and Dimensions Tables, Physical and **Logical Data Modeling**.
- Ability to collaborate with peers in both, business, and technical areas, to deliver optimal business process solutions, in line with corporate priorities.
- Expertise in various phases like understanding the **User Requirements, Analytics/Design, Testing, Project Management, and Product Development** along with end-to-end product delivery across the SDLC & STLC phases.
- Experience in utilizing **SAS** Procedures, VBA, Macros, and other SAS applications for data extraction, data cleansing, data loading, and reporting. Involved in the data analysis, DB creation, applying database constraints, and make ready to load onto the database.
- Experience with data analytics, data reporting, Ad-hoc reporting, Graphs, Scales, PivotTables and OLAP reporting.
- Strong experience in interacting with **stakeholders**/customers, gathering requirements through interviews, workshops, and existing system documentation or procedures, defining business processes, identifying, and analysing risks using appropriate templates and analysis tools.
- Experienced in working within an **agile** environment and demonstrating competency with agile requirements elicitation, analysis, specification, verification, and management practices, with the ability to apply them effectively in practice.
- Defines and implements **Data Governance** Management tools.
- Analysed data lineage processes to identify vulnerable data points, control gaps, data quality issues, and overall lack of data governance.
- Knowledge in deployment, data security, and troubleshooting of the applications using **AWS** services.
- Experience in coding **SQL/PL SQL using Procedures, Triggers, and Packages** in Relational Database Design, Data Warehouse/OLAP concepts and methodologies.
- Implemented Optimization techniques using Alteryx for better performance on the **ETL** side and on the database side.

SKILLS

Programming Languages: Python, R

Database: Microsoft SQL Server, Oracle, PostgreSQL, IBM DB2, MySQL, SQL, Snowflake.

BI Tools: Tableau, Microsoft Power BI, Qlik, Alteryx, Apptio, Power Query, Power Automate

MS Packages: Microsoft Office (Word, Excel, PowerPoint, Visio, Access, Project)

Google Packages: Google Suite (Sheets, Slides, Docs)

Advance Excel: Advanced Excel, VBA, Macros, Pivot Table, JSON, Power Automate

Data Analysis & ETL Tools: Talend, SSIS, SSAS, SSRS

IDE's: Visual Studio, PyCharm, Eclipse

Cloud: Amazon web services (AWS), Azure

Other: Git, Gitlab, Jira, Confluence

WORK HISTORY

Fannie Mae – Reston, VA

Nov 2022 – Present

Sr. Data Analyst

Responsibilities:

- Analysed and organized vast amounts of data with meticulous attention to detail, resulting in a 15% improvement in data accuracy and integrity.
- Leveraged expert-level Excel skills to manipulate disparate data sources, streamlining data processing and saving 10 hours per week on manual data entry tasks.
- Achieved key performance indicators and service level targets consistently, maintaining a 95% on-time delivery rate for critical projects.
- Leveraged programming and database querying tools (Python, SQL, AWS) to research, analyse and process data, resulting in a 30% reduction in data processing time.
- Developed SSIS Packages and Stored Procedures to cleanse the data from SQL Server, Oracle and Excel Files to Facts and Dimension Tables in the Data Warehouse.
- Developed a fundamental understanding of business processes, contributing to improved decision-making.
- Carried out multiple data manipulation and migration jobs using SQL and ETL tools like Qlik and Alteryx.
- Achieved advanced proficiency in Excel, VBA including Macros, Pivot tables, VLOOKUP and Formulas, improving data manipulation efficiency by 25%
- Spearheaded a process optimization project, leading to a 30% reduction in turnaround time for key business processes.
- Worked closely with business stakeholders and IT teams to analyze and resolve data issues within the enterprise data warehouse.
- Utilized Python for automation, reducing manual efforts in data processing by 30% and minimizing the risk of errors.
- Applied predictive analytics to build graphs and generate projections, contributing to a 12% improvement in forecasting accuracy.
- Leveraged Google Sheets for UAT, resulting in a 20% improvement in collaboration, feedback collection, and issue resolution during testing phases.
- Converted existing other tool reports to tableau dashboards using data blending, calculations, parameters, and different data visualizations.
- Utilized efficient systems, procedures, and management in Purchasing and Operations, including claims, fraud, and others to optimize supply chain processes, resulting in a reduction of inventory holding costs by \$1.2 million.
- Utilized business analysis tools such as JIRA and Microsoft Project to track team performance and calculate productivity.
- Implemented Technology Business Management concepts, resulting in a 25% improvement in cost visibility through the establishment of cost pools and towers.
- Crafted strategic dashboards using Tableau tailored to specific audience needs, leading to data adoption and utilization among different business units.
- Created insightful dashboards, transforming raw data into actionable insights, resulting in a 20% improvement in data visualization.
- Created comprehensive source-to-target mapping documents, capturing additional application data elements for enhanced data integration.
- Implemented automated data validation scripts, reducing manual effort by 20% and minimizing data discrepancies.
- Utilized innovative analytical approaches to perform statistical analysis on domain-specific source data, enabling the provision of accurate statements and conclusions.

Quartz Health Solutions – Madison, WI

Jan 2022 – Nov 2022

Business Data Analyst

Responsibilities:

- Constructed compelling presentations and visual dashboards in Power BI, receiving 95% positive feedback from customers and stakeholders for the clarity and impact of data communication.
- Explored the Medical domain and terminology like CPT, ICD10, NPI, DRG, Inpatient, outpatient, PII, PHI, ICH, GCP, and HIPAA, Policies and Claims datasets.
- Improved data processing efficiency for day-to-day reporting by implementing streamlined processes, leveraging Snowflake, which resulted in a 20% reduction in processing time.
- Implemented analytics for issuing and managing purchase orders, leading to a 20% improvement in process efficiency.
- Created a standardized catalogue of repairs with cost assumptions based on quotations and historical data, resulting in a 15% cost reduction.
- Maintained patient database using advanced SQL queries with supporting documentation for clinical scientists such as medical, safety and regulatory review.
- Showcased proficiency in TBM tools, particularly APPTIO, contributing to a 20% increase in tool efficiency and reporting accuracy.
- Conducted Business Intelligence (BI) analysis for the marketing team, reviewing the impact on key metrics in relation to the project within team collaboration.
- Utilized SAP Business Objects in designing and building the reporting environment.
- Updated and manipulated content and files by using R and Shell scripting.
- Created and developed Parameterized, Drill Down, and Drop- AD Hoc Reports using SQL Server Reports Services (SSRS).
- Contributed to the migration of databases to SQL Server, resulting in a 15% improvement in data retrieval speed.
- Demonstrated expertise in cost allocation, ensuring a 98% accuracy rate in allocating expenses across different business units.
- Scheduled the developed reports and adjusted them using the SSIS scheduler when they don't run properly.
- Created ETL scripts under Oracle database platform, cleared dataset anomalies using SSIS and SSAS.
- Led the technical support during application installations, upgrades, and migrations, reducing deployment time by 15%.
- Applied market analytics to optimize social media talent marketing (content, timing, channels), resulting in YOY and MOM growth in impression/clicks/apps.

Comcast – Hyderabad, India

Jan 2019 – Aug 2021

Business Data Analyst

Responsibilities:

- Created a conceptual design based on the interaction with the functional and technical team recommendations.
- Streamlined claims processing workflows, leading to a 13% reduction in processing time.
- Analyzed the existing data model and integrated new additions for advancing the data, identifying the cardinality of the new tables in relation to the existing tables, and ensuring proper referential integrity within the system.
- Authored and executed data queries, drawing insightful conclusions from quantitative analysis, contributing to a 20% continuous improvement in data-driven decision-making across the organization.
- Used Pivot tables for dimensional analysis to create status reports that drive deeper into our data.
- Implemented efficient ETL processes, reducing data integration time by 30%.

- Developing, maintaining, and managing advanced reporting, analytics, dashboards, and other BI solutions.
- Adapted in maintaining data quality, data organization, metadata, and data profiling.
- Developed multiple reporting cubes that are consumed through SharePoint integration.

Mind Craft Software Pvt. Ltd – Hyderabad, India

May 2017 – Dec 2018

Junior Data Analyst

Responsibilities:

- Created user stories for the team in JIRA following proper format and documented acceptance criteria in 'GIVEN, WHEN and THEN' format
- Designed data source layout including tables, files, and structures in Data Warehouses and Data Marts.
- Designed Data mapping and consolidation, cleansing, preparation, integration, ETL, and customization of data mart.
- Collaborated with technical teams to support data analysis.
- Developed executive summary, departmental and provider independent dashboards using SAP business objects.
- Developed a deployment plan, including reporting and monitoring for annual and weekly targets. Led, coordinated, and communicated the deployment plan in collaboration with the utility.
- Produced dashboard graphs, reports, and presentations showcasing client results and business outcomes. Possessing high attention to detail, along with strong analytical and problem-solving skills.
