

KRISHNAVASISTAMEDIPALLI

JAVADEVELOPER

+1(214)-499-9881 | vasista.java94@gmail.com

PROFESSIONAL SUMMARY

- Professional experience in the IT industry with 4+ years' experience as a java developer
- Worked with complete SDLC (software development cycle) design, development, testing, deployment, and implementation.
- Experience in handling big modules in national project.
- Expertise with different versions of eclipse.
- Experience in handling core java, advance java, struts, and spring.
- Worked as technical graduate assistant in Southern university.
- Familiar with the database scripts.
- Built applications using HTML, CSS, BOOTSTRAP, JAVA SCRIPT.
- Hands on experience with NODE JS, Angular and React.
- Expertise with Redmine tool.
- Worked on AWS, Microsoft Azure cloud services.
- Experienced in LINUX operating system

CERTIFICATIONS

- Certified AWS certified cloud practitioner
- Certified IBM cloud enterprise
- Certified AWS academy graduate
- Certified IBM starting enterprise data science
- Certified IBM data science foundation's level 1.

TECHNICAL SKILLS

- Programming Languages: Core Java (1.7,1.8), Python 3
- Java/J2EEE Technologies: JDBC-4.2, JNDI, Connection Pooling, Servlet-3.1, JSP-2.2, JSTL
- J2EE Frameworks: JMS and Web Services, Spring, Spring Boot, Micro Services, AWS, Kafka.
- Spring Cloud Technologies: Spring boot (Eureka, Zip kin)
- Cloud Technologies: AWS, Microsoft Azure, IBM Cloud technologies.
- Web Technologies: HTML, DHTML, CSS, Node JS, Angular, Bootstrap, JSON, jQuery, Ajax
- IDE Tools: Eclipse (Helios, Indigo & JUNO), NetBeans 6.x
- Build Tools: Maven, Gradle
- SCM Tools: GIT, SVN
- Servers: Apache, Tomcat
- Database: Oracle 11 G (SQL, PL/SQL), MySQL, SQL Server, PostgreSQL.

EXPERIENCE

Software Associate | Full Stack Java Developer

Project Description: The project mainly handled all the REST API related operation of Fly Delta and Virgin Atlantic airlines mobile applications where customers can have access to shop, check-in, tracking the flights and baggage etc. There are different teams working for different segments.

Roles and Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC) such as requirements gathering, modeling, analysis, design, development, and testing.
- Responsible for creating efficient design and developing user interaction screens using HTML5, CSS3, JavaScript, jQuery, Ajax for service calls on pages to interact with the server.
- Involved in migration of project from spring boot to AWS using AWS cloudwatch, AWS Direct Connect, AWS storage gateways etc.
- Worked in different areas of the project while working with different defects in the projects.
- Worked with NODE.JS for while working with AWS CDK for calling AWS endpoints.
- Hands on experience with Aws Quarkus for application layer connectivity.
- Developed the monolithic application and involved in migrating existing monolithic application into Micro Service Architecture based RESTful Service and deployments were done on AWS.
- Worked within three different teams and achieved many milestones by completing different stories within sprint planning time with great coordination.
- Used AWS Cloud Watch to monitor the application and to store the logging information.
- Re-design and implement CI build system using Jenkins.
- Focused on Test Driven Development by creating detailed JUnit tests for every single piece of functionality before writing the functionality.
- Developed a co-branding banner of American Express card holders in Delta airlines market for fly delta application of both Android and IOS.
- Interacting and participating in meetings along with product owner and clients to understand their needs and propose design to the team to implement the requirement.
- Used GIT to maintain the version of the files and took the responsibility to do the code merges from branch to trunk and create new branch when new feature implementation starts.
- Worked in Agile TDD environment using SDLC tools like GIT, Jira, Jenkins, and Maven for build packaging and deployments of the application components.
- Implemented core features of Angular 13 framework such as dependency Injection, Databinding, Filters, Directives, Templates, Services and Deep Linking Designing.

Graduate Research and Technical Assistant | Southern University and A&M College, Baton Rouge, LA | Jan 2021 – May 2022

Project Description: This project is completely related to the payroll department in Southern University based out of Baton Rouge (LA). As a team we would maintain the entire track of people who were working under university payroll. This entire project was under the guidance of our professor.

Roles and Responsibilities:

- Worked on java to build this project. Created three different users for this project.
- Worked on all phases of SDLC.
- I have created different login UI using HTML, CSS and BOOTSTRAP.
- Created database using MYSQL and used for storage of information of students.
- Built logical modules using STRUTS.
- Data flow between modules using JSON, ANGULAR
- Worked on payments as well as the total number of hours worked by the total number of hours worked by a student

Java Developer | NIC Hyderabad | Dec 2019- Dec 2020

Project Description: A government project which deals with the 23 states Government issued license. This project is majorly deals with any kind of issues that they may experience, majorly was working on Road Transport Department. A portal was created to log the issues which is Sarathi.

Roles and Responsibilities:

- Worked majorly with database IDE of the project.
- Indulged in developing by coding modules of the project.
- Handled the coding and development of complete modules from scratch independently.
- Proficient in bulk scripting for multiple datasets
- Used MySQL and Postgre SQL scripts to update, delete, add, and rename different elements in different schemas.
- I used to insert images and signatures with my scripts.
- Database scripts are used to solve the tickets, every script will modify database of the entire whole project.
- Post deployment I was individually handling the bugs raised and to make the necessary changes on the code which made the product user friendly. These challenges made coding more interesting.
- Knowledge on testing during coding as it is part of flow of coding. Where I was dealing with the bugs raised by our QA team.
- The entire team was dealing with 23 states out of which I have been assigned 2 states. Where I need to solve every issue either with respect to frontend, backend and issues regarding database.
- Worked with the tools like Redmine, SVN during this project.

Software Associate | Flipkart Hyderabad | Aug 2019- Dec 2019

Project Description:

Flipkart is an E-commerce company headquartered in Bangalore, Karnataka. In this project, I worked on the Products module, where users can search for the desired products. Classification of the Products module is done as Laptops, mobiles, electronics etc., and these are further classified into categories and sub-categories. On clicking a specific product more details about the product can be seen.

Roles and Responsibilities:

- Worked on Flip-Kart web portal by using software development process such as agile methodology, analyzing requirements and risks using object-oriented development.
- Created UML diagrams and developed Use Cases based on the business and functional requirements.

- Written Java Script, HTML, CSS, Servlets, and JSP for designing GUI of the application.
- Worked with Spring framework MVC, Hibernate.
- Implemented RESTful web services using JAX-RS Annotations.
- Tested the UI application by writing test cases, bug tracking by using JIRA.
- Used Jenkins for Continuous Integration and Maven for Deployment.
- Prepared technical and documentation reports during the program development.

PROJECT EXPERIENCE

- I did my masters project on educational certificate authenticator using java as main programming language. I wrote the logic using spring. I have used junit for writing test cases. I worked with different databases like oracle and MYSQL. I have also developed student payroll portal using Angular and Javascript. In payroll project I have mainly dealt with front end UI part of the project.
- Completed both my Mini and Major projects on Cloud Computing in association with RedHat during my under-graduation. My mini-project was “Cloud-Based Student Chat-Bot” where we designed a virtual assistant that can be used via a third-party mobile application that provided information about college events, career fairs, Scholarships, etc. to students. I have worked on writing business logic for this project using advance java and hibernate using ORM relationship. We have used the MYSQL database for storing the data. During the functionality of project, we have integrated with cloud.
- Both my bachelor’s projects were team projects, and I was the project leader of my team. My Major project was a web application that helped E-learning by generating automatic question papers for exams for Institutions from already stored question banks where the questions can be added by professors and students, who can prepare for the exams from the question bank that was already present preventing out of syllabus questions.

EDUCATION

Master of Science in Computer Science and Information Systems | Southern University and A&M College, Baton Rouge, Louisiana, USA | Year of Graduation: May 2022

Bachelor of Technology – Computer Science | Jawaharlal Nehru Technological University, Hyderabad, Telangana, India | Year of Graduation: 2019
