Professional Experience

Full-Stack Developer, Mastercard, (Contract) 09/2023 – Present | Remote, USA

- Worked on the migration from a monolithic batch fraud notification system to a scalable microservices architecture, ensuring high performance and resilience.
- Designed and implemented fault-tolerant, event-driven architecture using Kafka, processing over 100,000 daily events and mitigating \$10-\$100M in potential fraud.
- Enhanced data accuracy and regulatory compliance with Spring Boot, Spring Data JPA, and Spring Security, preventing multimillion-dollar litigation risks.
- Developed and deployed RESTful APIs and ensured smooth integration with React JS for real-time updates.
- Utilized AWS, PCF, Docker, Redis, and Jenkins for continuous deployment and cloud infrastructure.
- Implemented robust logging and monitoring using Spring Actuator with Grafana, improving the incident response time by 20%.

FullStackDeveloper, Hewlett Packard Enterprise 06/2020 – 08/2021 | Bangalore, India

- Collaborated in a team of 7 engineers to build and enhance e-commerce catalog services for an eBay client, significantly improving user experience and reducing post-deployment issues by 30%.
- Executed over 200 automated test cases using Jest and resolved over 50 critical bugs prior to deployment.
- Worked with team to develop RESTful APIs and integrated them with a React front-end, ensuring real-time updates and seamless user interactions.
- Improved application performance by leveraging Node.js, Express.js, and MongoDB for backend development.
- Maintained a 95% user satisfaction rate by implementing Azure App Services, Azure SQL, and Azure Key Vaults for secure and scalable cloud solutions.
- Reduced user issues resolution time by 50% through active monitoring using Azure Application Insights and supporting Agile/Scrum processes.

Senior Software Engineer, Capgemini 07/2016 – 05/2019 | Hyderabad, India

- Contributed to a 10-member team in developing a robust Kemper insurance management system, optimizing processes for policy sanctioning and claims management. improved operational efficiency and accuracy.
- Seamlessly integrated REST API calls with UI components using Angular and TypeScript, ensuring consistent data flow and real-time updates across the application, thereby enhancing functionality and user experience.
- Developed custom Angular directives for dynamic UI elements, allowing real-time responsiveness to user inputs and improving overall application usability and engagement and use AWS S3 for secure file storage and retrieval.
