

SHEIKFAZIL S

Email: sheikfazil1409@gmail.com | Mobile: 8438394561

PROFESSIONAL SUMMARY

- Data Engineer with 5+ years of experience in designing and managing data pipelines within the healthcare domain.
- Strong experience in SQL, Python, PySpark, and Hadoop for building scalable data processing systems.
- Proficient in developing ETL workflows using Informatica PowerCenter, integrating data from various healthcare source systems.
- Hands-on experience in orchestrating workflows using Apache Airflow to automate and schedule data pipelines.
- Skilled in leveraging AWS services including Glue, Lambda, S3, and Step Functions for cloud-based data engineering.
- Worked extensively with Snowflake for data warehousing, data transformation, and analytics enablement.
- Implemented data quality checks and validation routines to ensure reliable, accurate, and compliant healthcare data.
- Collaborated with business and analytics teams to support healthcare data use cases including claims analytics and reporting.
- Automated manual processes to improve pipeline efficiency, reduce failures, and increase operational productivity.
- Actively learning Machine Learning and Data Science to expand capabilities for future data-driven roles.

TECHNICAL SKILLS

- Programming & Scripting: Python, SQL, PySpark, Shell Scripting
- Big Data Technologies: Apache Spark, Hadoop (HDFS, MapReduce, Hive), Kafka
- ETL & Workflow Orchestration: Informatica PowerCenter, Apache Airflow, AWS Glue
- Cloud Platforms: AWS (Lambda, Glue, S3, Step Functions, EC2)
- Databases & Data Warehousing: Snowflake, MySQL, Oracle, PostgreSQL
- Data Processing & Automation: Data Modeling, Data Migration, Pipeline Optimization, Data Validation Automation
- Tools & Utilities: Jupyter Notebook, Visual Studio Code, Git, Google Colab, Bitbucket
- Monitoring & Logging: CloudWatch, Splunk
- Learning: Currently enhancing skills in Machine Learning and Data Science for advanced analytics applications

WORK EXPERIENCE

Secova Solutions | Data Engineer | 2020 – Present

PROJECT

Claims Data Engineering Platform for Healthcare Analytics

Project Duration: AUG 2020 – Present (5 Years 3 Months)

Client: A3Logics

Domain: Healthcare

- Designed and maintained end-to-end data pipelines to process claims, provider, and member datasets for analytics and reporting.
- Developed PySpark-based data transformation workflows to standardize and cleanse healthcare claims data from multiple sources.
- Built ETL workflows in Informatica PowerCenter to support data ingestion, data quality checks, and loading into Snowflake and AWS S3.
- Created Apache Airflow DAGs for workflow orchestration, ensuring automated scheduling, dependency handling, and error notifications.
- Leveraged AWS Glue for scalable data processing and AWS Lambda for automated event-driven transformations.

- Implemented data validation routines to ensure compliance, accuracy, and availability of claims data for downstream analytics teams.
- Optimized data pipelines through performance tuning, partitioning, and metadata-driven frameworks, reducing processing time and operational overhead.

EDUCATION

- B.E – Electronics & Communication Engineering, Sengunthar Engineering College – 2020 (CGPA: 6.8)
- Higher Secondary Certificate – Holy Angel's Matriculation School – 2015 (70%)
- Secondary School Leaving Certificate – New Oxford Matriculation School – 2013 (82%)
