## PROFILE SUMMARY

---

Analytical and detail-oriented Data Analyst/Business Analyst with over 4 years of combined experience in India and the USA. Skilled in data analysis, business intelligence, and reporting across healthcare, financial, and e-commerce sectors. Adept at leveraging data-driven insights to drive strategic decision-making and optimize business performance. Proficient in SQL, Python, Excel, Tableau, and Power BI. Seeking an opportunity to contribute to impactful projects in a growth-oriented organization.

## EDUCATION

---

### Master of Science in Technology Management

University of Massachusetts Dartmouth, USA

Sept 2023 - May 2025

### Bachelor of Technology in Electronics and Communication Engineering (Hons)

Lovely Professional University, India

July 2018 - Dec 2022

## SKILLS

---

**Data Analysis & Visualization:** SQL, Python, Excel, Tableau, Power BI

**Business Intelligence:** KPI definition, data modeling, reporting

**Tools & Platforms:** MySQL, MS Excel, JIRA, GitHub

**Domain Knowledge:** Healthcare, Financial Services, E-commerce

## EXPERIENCE

---

### Data Analyst | Morgan Stanley | USA

May 2025 – Present

- Provided strategic, analytical, and technical support for Business Intelligence initiatives, enabling data-driven decision-making across operations, engineering, and sales.
- Utilized SQL, Python, Excel, and other tools to generate reports and develop practical solutions for complex business challenges.
- Transformed standalone reporting into a coherent and extensible ETL workflow, enhancing efficiency and scalability.
- Developed complex and accurate SQL queries to handle massive datasets and extract actionable insights.
- Designed foundational dashboards for executives to monitor trends and drill down into detailed metrics.
- Achieved up to 90% reduction in core scripting lines, improving readability and accuracy.
- Automated quarterly business review processes to increase reliability and free up time for analysis.
- Overhauled backup and snapshot processes to reduce redundancy while maintaining system resiliency.

### Business Analyst | CVS Health | USA

April 2024 – April 2025

- Gathered and analyzed business requirements using brainstorming sessions, interviews, and surveys to inform system design and process improvements.
- Planned, defined, and documented system requirements using Use Case, Use Case Scenarios, and UML Unified Modeling Language (UML) methodologies to ensure clear technical alignment.
- Managed financial analysis, budgeting, and expense estimations, ensuring accurate allocation of resources and optimized cost planning.
- Developed and maintained dashboards and reports using SQL, Python, Excel, Tableau, and Power BI, transforming standalone reporting into scalable ETL workflows.
- Created complex SQL queries and automated reporting pipelines to process large datasets and deliver actionable insights for operations, finance, and executive leadership.
- Designed training materials and managed comprehensive accounting processes, including accounts receivable and payable, improving efficiency and resource utilization.
- Determined functional and non-functional requirements through user interviews and collaboration with cross-functional teams, ensuring solutions met business objectives.
- Automated quarterly business review processes and streamlined scripts, achieving up to 90% reduction in redundant code, improving readability, accuracy, and reporting speed.
- Built foundational dashboards to help executives monitor trends, drill down into metrics, and make data-driven decisions across operations, sales, and engineering.

### Jr. Business Analyst | Netflix | India

Jan 2023 – July 2023

- Interacted with client departments and IT teams to analyze, review, and estimate client requests resulting in accurate and comprehensive client documentation for Personal Lines Property and Casualty business.
- Extracted Business Requirements from end users using Rational RequisitePro ensuring Business Requirement Documents (BRD) aligned with user needs.

- Designed and developed Use Cases, Activity Diagrams, and Sequence Diagrams using UML and Business Process Modeling to visually map business processes and improve system understanding.
- Performed Business Process Mapping and as-is/to-be analysis enabling identification of gaps and areas for process improvement.
- Developed test plans in collaboration with team leads and business personnel to conduct unit, integration, and regression testing effectively.
- Analyzed business and functional requirements to develop detailed test plans and test cases in Test Director ensuring thorough validation of application functionality.
- Reviewed Development Plans, QA Test Plans, and User Documentation to confirm correct interpretation of original specifications and maintain quality standards.
- Conducted Functional Walkthroughs and User Acceptance Testing (UAT) and supervised the creation of User Manuals ensuring successful adoption and accurate guidance for customers.

**Programmer Analyst Intern | Cognizant | India**

**Jan 2022 – Nov 2022**

- Assisted in gathering and translating business requirements into data queries, reports, and basic data specifications.
- Wrote and optimized SQL queries (Teradata/Hive) to support ad-hoc analysis, recurring reports, and data quality checks.
- Created monthly and quarterly reports by joining data from multiple tables and validating results for accuracy and completeness.
- Performed data validation and reconciliation, including source-to-target checks and null/aggregation analysis.
- Analyzed large datasets in Hadoop data lakes using Hive to identify missing data, inconsistencies, and load issues.
- Supported report automation by developing BTEQ scripts in Unix and scheduling jobs using crontab.
- Built and maintained Tableau dashboards with filters, drill-downs, and basic security to support business monitoring.

**Junior Data Analyst | Cognizant | India**

**Jan 2020 – Dec 2021**

- Assisted in gathering and translating business requirements into data queries, reports, and basic data specifications.
- Wrote and optimized SQL queries (Teradata/Hive) to support ad-hoc analysis, recurring reports, and data quality checks.
