EXPERIENCE

Bank of New York Mellon

August 2023 – June 2024

FULL-STACK SOFTWARE DEVELOPER

- Participated in migrating on-premises .NET and angular applications to AWS Cloud Services
- Main responsibility was upgrading 40+ .NET and Angular legacy applications from older .NET frameworks to newer versions (.NET core 6 & .NET Framework 4.8) extending lifetime support from Microsoft
- Took the lead in deploying the upgraded applications to the cloud working with DevOps and QA teams.
- Responsible for Authorization changes from EWS to OAuth 2.0 tokens
- Responsible for developing real-time UI updates on the ASP.NET MVC application
- Utilized Visual Studio and Postman to debug post-upgraded ASP .NET web forms and MVC applications
- Tested and troubleshoot locally and deployed applications using tools such as Visual Studio, SSMS, and Postman

Revature

November 2022 – August 2023

FULL-STACK SOFTWARE DEVELOPER

- Designed, developed, and managed web applications for a document management solution company using .NET and Angular
- Designed and Built an API for Thumbnail Generator using ASP.NET and a Script written in C# for cleaning up idle thumbnails and deployed applications on both Linux and Windows servers, respectively, ensuring cross-platform compatibility.
- Implemented efficient file management using SFTP servers for storing and serving PDF documents and thumbnails
- Designed and optimized normalized SQL tables and crafted stored procedures for enhanced database performance.
- Debugging front-end issues with Chrome developer tools, and testing API endpoints with Swagger and Postman.
- Utilized Office 365 and Azure DevOps to manage resources and code, respectively.
