

Uzair Naeem

Highly skilled .NET Developer with a Master's degree in Computer Science and **over 4 years** of experience designing, coding, and testing robust and scalable applications using .NET Core, C#, HTML, JavaScript and React. Proven track record of successfully delivering **9 projects**, including integrations, mobile and web applications, and D365 customizations for **5 clients**.

Work Experience

Senior Software Engineer | Folio3 | Karachi, Pakistan

Jan 2020 – Aug 2022

- Designed, developed and optimized backend microservices and RESTful APIs using .NET Core and C#, ensuring **high performance and scalability** for various modules including Warehouse Management and Production Control in D365 F&O and AX 2012. Implemented Azure Virtual Machines, Azure App Service, and deploy microservices effectively.
- Developed and tested a "Warehousing app" for inventory management module, utilizing X++ for D365 development and C# .NET Core for middleware. This solution enables users to perform operations with a **single interaction** on their scan gun.
- Developed and tested the web application "Ardia" for the production module, utilizing SignalR for real-time communication of weight data from Comport to the front-end, and ZPL for label printing. This solution significantly improves efficiency by enabling instant label printing **within 1 second**. Implemented Azure SQL Database and Redis DB on Azure to ensure efficient data management for the application.
- Customized and enhanced React-based web applications, creating **reusable UI** components in JavaScript to deliver responsive and device-agnostic user interfaces. Utilized Agile development practices and CI/CD pipelines in Azure DevOps to ensure seamless deployment and updates for the front-end application.
- Automated recurring expense report generation and approval for over 500 users using OCR technology with C# and Google Tesseract, **reducing manual input time by 30-50%**.
- Responsible and Accountable** for diagnosing and resolving production issues in D365 F&O and AX 2012, as well as investigating and rectifying app and integration issues. Leveraged Azure monitoring tools and debugging techniques to identify and resolve issues effectively.
- Led code refactoring initiatives to **optimize backend performance**, reducing code complexity by 20-30% and improving maintainability and scalability in line with continuous integration practices. Utilized established coding standards and best practices to ensure code quality, maintainability and ensure consistent deployments.

Software Engineer | Folio3 | Karachi, Pakistan

Nov 2017 – Dec 2019

- Managed and executed 2 integration projects simultaneously, managed the entire development process and achieved **100% client satisfaction** and on-time delivery. Demonstrated strong communication and collaboration skills by working closely with stakeholders to ensure project success.
- Designed and implemented a new feature for an advanced pricing module, integrating it seamlessly with D365 and E-Commerce platforms. This new feature significantly contributed to the success of integration projects, **becoming a key selling point**. This project involved working with cross-functional teams to ensure a smooth integration process.
- Optimized backend data retrieval processes, reducing fetch time from **30 seconds to 3-5 seconds**, significantly improving system efficiency and user experience.
- Technical lead** for backend development, working closely with various teams to address go-live challenges, decreased post-launch bugs and enhanced system stability through code reviews. This role involved the implementation of comprehensive testing procedures to ensure system stability and reliability.

Education

University of North Texas | Denton, US | MS in AI | 3.81 CGPA

Aug 2022 – May 2024

- Relevant courses and exposure to diverse open-source Machine Learning projects in relevant courses including **Deep Learning, Big data, and Natural Language Processing**.

NED University | Karachi, Pakistan | BS in CS | 3.61 CGPA

Jan 2014 – Oct 2017

Skills

D365 F&O, X++
C#, .NET Core, ASP.NET MVC,
Entity Framework
React, JavaScript, HTML/CSS
SQL, RDBMS, Redis
SSRS Reports
RESTful APIs, Microservices, Web
Services
CI/CD Pipelines, TFS, Git, Visual
Studio
Azure
Troubleshooting Issues
Communication
Teamwork
Unit Testing

Educational Skills

Python
Notebook, Fast API, StreamLit, etc
Machine Learning (scikit-learn,
PyTorch, NumPy, Pandas, etc)
Deep learning
NLP
LLM (Google Gemini)
Tableau / Power BI
Statistical analysis
Big Data (Hadoop and Spark)

Languages

Urdu (Native)
English B2 (6.5 bands in IELTS
Academic)

Other activities at Folio3

Mentored and trained junior
resources.

Organizer and participant of Idea
bash / Code wars.

Employee of the month nominee
at Folio3 in Feb, March, July 2018,
and July 2020.

Member of the organizing
committee of internship program
in 2019 and 2020.
