Professional Profile

- Innovative Full Stack Developer and AI Engineer with a proven ability to design and build scalable, cloud-native applications across sectors including banking, education, and emergency management. Specialized in crafting high-performance systems with clean architecture, strong security, and seamless UX for thousands of users.
- **Lead Developer of Activlingo** – an AI-powered language learning platform that simulates real English conversations using speech recognition, TTS, and smart feedback. Engineered the entire stack using Angular, FastAPI, Supabase, OpenAI, and LangChain, delivering a responsive, production-ready app for web and mobile.

Work Experience

Software Engineer (Full-Stack & Mobile) – Activlingo

Florida, USA. April 2025 - Present

- Created and launched Activlingo, an AI-powered English learning platform that helps users practice real conversations with intelligent feedback, vocabulary tracking, and voice interaction.
- Led the full-stack development and DevOps, integrating Angular, FastAPI, Supabase, Whisper, and LangChain into a scalable web and mobile solution.

Technologies: Flutter, Dart, Angular 19, FastAPI, Supabase, LangChain, OpenAI APIs, Whisper, TTS, PostgreSQL, Stripe, Docker, GitHub Actions, DigitalOcean, Nginx, TailwindCSS.

Software Engineer - Daytona State College

Florida, USA. April 2024 - April 2025

- Designed and implemented critical Oracle ERP enhancements across Finance, Campus Solutions, and HR modules, improving operational efficiency for 1,304 employees and 28,000 students. Optimized backend processes, resulting in a 15% increase in system performance.
- Worked on diagnosing and resolving a system slowdown issue, leading to a 20% improvement in performance by troubleshooting server configurations and applying best practices.

Technologies: PeopleSoft, App Engine, Component Interfaces, SQL, Oracle DB, SFTP, AWS, C#.

Java Full Stack Developer - IBM

Manizales, Colombia. July 2023 - October 2023

- Collaborated on an IBM project for Davivienda Bank, improving their digital banking infrastructure and enhancing the overall customer experience, serving millions of active users. This initiative was part of IBM's strategy to advance financial technology solutions.

Technologies: Java, Spring Boot, Angular, REST APIs, Docker, Git, IBM Cloud, SCRUM.

Back End Developer - National University of Colombia

Manizales, Colombia March 2022 - June 2023

- Contributed to the development of a project that demonstrated significant social impact by developing an Early Warning System (EWS) to predict and alert on potential flood and landslide risks for 460,000 residents in Manizales.

Technologies: Python, Laravel, PostgreSQL, REST APIs, Git, Github, Docker, PHP, Go.

Education and Certifications

Bachelor of science in Information Systems Administration, Universidad Nacional de Colombia
[Degree validated and reviewed by World Education Services \(WES\) for equivalency in the United States.](#)
[AWS Solutions Architect Associate](#) - [AWS Developer Associate](#) - [International Academic Qualifications](#)

Languages

- **English (Advanced), Spanish (Native)**
