

ARAVIND MALLAIAHGARI

.NET DEVELOPER

Location: OH | Phone: +1 937 317 0854 | Email: aravindrao697@gmail.com | <https://www.linkedin.com/in/aravind-mallaiahgari/>

SUMMARY

- **Results-driven .NET Developer** with **4+ years of experience** in designing and maintaining high-performance web applications and distributed systems using C/C++ and .NET technologies such as **.NET Core, .NET 6/7, ASP.NET MVC, ASP.NET Web API, Blazor, and Razor Pages** for scalable and responsive solutions.
- **Experienced in front-end development** with **HTML, CSS, JavaScript, TypeScript, Angular, React.js, and Vue.js**, enhancing user interactions and interface performance.
- **Skilled in optimizing SQL queries** and integrating **Oracle, NoSQL databases like MongoDB and Cassandra**, improving data handling efficiency and query performance.
- **Adept in leveraging cloud platforms** with **Azure (AKS, DevOps, Blob Storage, Functions)** and **AWS (EC2, S3, RDS, Lambda)** to deploy scalable and cost-effective applications.
- **Expert in designing and implementing RESTful APIs and microservices**, facilitating seamless data exchange and system integration for real-time applications.
- **Proficient in Docker and Kubernetes** for containerization and orchestration, with experience in **CI/CD pipelines using Jenkins and Azure DevOps**, optimizing deployment processes and enhancing application scalability.
- **Skilled in applying testing frameworks** like **MSTest, xUnit, NUnit**, and tools such as **Selenium and Postman**, ensuring robust application performance and quality.

TECHNICAL SKILLS

Programming Languages:

C#, C++, .NET Core, .NET Framework, .NET 6/7, Java, Python, SQL.

Databases:

MySQL, SQL Server, Oracle, MongoDB, NoSQL, Cassandra.

Web Technologies:

ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Razor Pages, HTML, CSS, JavaScript, Typescript, Angular, React.js, Vue.js, Node.js, REST API, JSON, Bootstrap, jQuery, XML.

Frameworks and Libraries:

Entity Framework Core, Blazor, SignalR, Micro services Architecture, IdentityServer4, JWT Tokens, OAuth.

Cloud Technologies:

Azure (Azure Kubernetes Service (AKS), Azure DevOps, Azure Monitor, Azure Blob Storage, Azure Azure Functions, Azure Active Directory), AWS (EC2, S3, RDS, Lambda, DynamoDB, CloudWatch), Docker, Kubernetes

Scripting Languages:

Shell Scripting, PowerShell

Testing Frameworks:

MSTest, xUnit, NUnit, Moq, SpecFlow

DevOps & CI/CD Tools:

Jenkins, Azure DevOps, GitLab CI/CD

IDES & Application Server:

Visual Studio, IIS, Eclipse

Methodologies:

SDLC, Agile, Waterfall.

Version Control Tools:

Git, GitHub

Operating Systems:

Windows, Linux

Other Tools:

JIRA, ServiceNow, Postman, Swagger, Selenium, NUnit Test Adapter, Fiddler, IBM MQ, RabbitMQ

EDUCATION

University of Dayton

Masters in Computer Science and Engineering

OH, USA

Aug 2022 – May 2024

Jawaharlal Nehru Technological university

Bachelor of Technology in Computer Science and Engineering

Hyderabad, India

Aug 2016 – Sep 2020

PROFESSIONAL EXPERIENCE

Epsilon

OH, USA

.Net Developer

Jul 2024 - Current

- Developed and maintained scalable **.NET applications** using **.NET Core, .NET Framework, and .NET 6/7**, enhancing performance by 30% and reducing load times by 20%. Handled over 1 million transactions per day, ensuring high reliability.
- Designed and built **RESTful APIs and micro services** with **ASP.NET Core** and **ASP.NET Web API**, improving integration efficiency by 25% and speeding up data retrieval by 40%.
- Developed responsive and interactive user interfaces using **Angular, Typescript, HTML, CSS, and Bootstrap**, increasing user engagement by 35% and improving page load times by 25%.
- Leveraged **AWS (EC2, S3, RDS, Lambda, Dynamo DB)** to deploy high-performance applications, cutting infrastructure costs by 40% and boosting uptime to 99.9% through auto-scaling and load balancing.
- Adopted **CI/CD pipelines** using **AWS Code Pipeline** and **Jenkins**, reducing deployment times by 60% and lowering production defects by 15%.
- Applied **TDD methodologies** with **MS Test, xUnit, and NUnit**, increasing code coverage by 20% and reducing post-release bugs by 25%.
- Optimized backend operations with **Entity Framework Core** and **SQL Server**, improving query performance by 50% and reducing response times by 60%.
- **Managed containerization and orchestration** using **Docker and Kubernetes**, streamlining application deployment and scaling across multiple environments.
- **Developed high-performance modules** in **C++** to enhance core functionalities of legacy systems, integrating with **.NET applications** for improved computational efficiency, leading to a **30% reduction in processing time** for critical tasks.

- Developed and maintained an **Inventory Management System** using **ASP.NET MVC** and **ASP.NET Web API** for a major retail client, ensuring robust, scalable, and high-performing solutions to manage inventory across 500+ locations. Enhanced system reliability by 25%.
- Created and integrated **RESTful APIs**, supporting frontend applications with improved data retrieval and manipulation capabilities, leading to a 30% increase in operational efficiency for the client's inventory management team.
- Designed and implemented responsive, user-friendly interfaces using **HTML, CSS, JavaScript, Typescript, and Bootstrap**, enhancing the user experience for the retail staff managing inventory, leading to a 35% reduction in training time.
- Developed a **React.js** inventory dashboard, enhancing real-time data visualization and boosting operational efficiency by 30%.
- Integrated **Node.js** with **.NET APIs** for high-volume asynchronous data processing, boosting backend performance by 35% and improving scalability through efficient **micro service** communication.
- Deployed **NoSQL databases (MongoDB)** to store unstructured inventory data such as product descriptions and supplier details, reducing data storage costs by 20% and improving flexibility in data handling.
- Utilized **GitHub** for version control, managing 200+ commits and 50+ pull requests, ensuring code quality and collaboration within the team. Integrated **CI/CD pipelines** using **Azure DevOps**, reducing deployment times by 60%.
- Applied **Agile methodology** for project development, organizing sprint planning and daily stand-ups to improve team collaboration, leading to a 20% increase in on-time project delivery.
- Deployed the application on the **Azure cloud platform**, leveraging services such as **Azure Functions, Azure Blob Storage, Azure SQL Database, and Azure App Service**, resulting in a 40% reduction in infrastructure costs and ensuring 99.9% uptime.
- Conducted automated and manual testing using **Postman, Selenium, MSTest, and xUnit**, resulting in a 25% decrease in post-deployment bugs and a 30% improvement in code quality.
- Implemented **JMeter** for performance and load testing, optimizing the system to handle peak traffic, supporting over 500 concurrent users without performance degradation.
- Applied **real-time algorithms** to optimize inventory levels, improving stock management and reducing overstock by 15%, and improving overall inventory turnover by 20%.

Trinity Technolabs, Client: Espire
Role: .Net Developer

Hyderabad, India
Mar 2019 - Jun 2020

- Developed and maintained a CRM system using **ASP.NET MVC, Blazor, and Razor Pages**, improving overall performance by 25% and reducing response times by 20% for over 10,000 global users.
- Built **RESTful APIs** with **ASP.NET Web API** and integrated with **Blazor** frontends, enhancing data exchange efficiency by 30% and streamlining customer interactions across web applications.
- Implemented Razor Pages for dynamic content rendering, improving page load times by 35% and enhancing user experience across the CRM platform.
- Developed front-end features with **Angular, TypeScript, and Blazor**, enhancing user interaction by 30% and reducing stock outs by 20% in an inventory management system.
- Optimized **SQL and Oracle databases** for handling over 1 million records, reducing query execution times by 40% and improving data access by 20%, enabling faster customer data retrieval.
- Orchestrated **Azure Kubernetes Service (AKS)** for containerized app management, boosting scalability by 35% and cutting deployment times by 50% across global regions.
- Scripted automation processes using **Shell Scripting and PowerShell** to manage cloud infrastructure and deployments for an enterprise-level healthcare application. This reduced manual configurations by 50% and ensured consistent environments across AWS and Azure.
- Utilized testing frameworks such as **MSTest, xUnit, and NUnit** to ensure high-quality code delivery. Applied automated test coverage strategies, resulting in a 20% reduction in post-release defects and improving overall code reliability.
- Managed **Agile development processes** for a real-time retail analytics project, coordinating with cross-functional teams. This improved project visibility by 20% and led to the on-time delivery of key features, meeting client deadlines for a product launch.
- Automated **CI/CD pipelines** using **Azure DevOps and Jenkins** for a logistics management platform, reducing deployment times by 60% and cutting manual testing efforts by 40%. This ensured the on-time release of new features and updates, with a 15% decrease in production defects.

Trinity Technolabs
.Net Developer

India
Sep 2018 - Feb 2019

- Developed responsive user interfaces with **React.js, HTML, CSS, and JavaScript**, seamlessly integrated with **.NET Core RESTful APIs**, resulting in a 25% increase in user engagement for real-time applications.
- Deployed applications on **AWS**, leveraging services like **EC2, S3, and RDS** to ensure 99.9% uptime while reducing infrastructure costs by 20% through optimized resource management.
- Enhanced backend performance by integrating **Node.js** with **.NET Core APIs**, improving asynchronous data processing and reducing response times by 35%, handling 100,000+ real-time transactions daily.
- Optimized database operations with **SQL Server** and **NoSQL databases** like **DynamoDB**, achieving a 50% improvement in query performance and efficient data management for real-time, high-volume datasets.
- Streamlined deployment using **AWS CodePipeline**, cutting deployment times by 60% and ensuring rapid release cycles in an **Agile** environment with continuous updates.

CERTIFICATION

Certified in Azure Cloud Fundamentals from Microsoft (AZ-900).
