KEY ACHIEVEMENTS

Improved workflow efficiency by 32% at M&T Bank

Reduced change-related rework by 28% and production defects by 22%

Improved reporting accuracy by 30% in banking operations

Delivered 40% workflow improvement at Synchrony Financial

Reduced requirement gaps by 35% through improved documentation

Built SQL-driven performance dashboards used across multiple teams

CERTIFICATION

Microsoft Certified: Azure Security Engineer (AZ-500)

ADDITIONAL HIGHLIGHTS

Strong background in **banking, lending, payments, credit risk, and financial operations**

Senior Business Analyst | Banking | Finance | Data Analytics

+1 (682)-402-9412 @ abdulai.c@jobtecmail.net Dallas, TX

SUMMARY

Business Analyst with **7+ years of experience** delivering digital transformation, process optimization, and data-driven solutions in banking and financial services at **M&T Bank** and **Synchrony Financial**.

Expert in **requirements gathering, financial analysis, SQL-based data analytics, process redesign, predictive reporting, UAT, Agile delivery**, and cross-functional collaboration.

Proven ability to streamline processes by **25–40%**, reduce defects, improve reporting accuracy, and support multi-million-dollar initiatives across lending, credit risk, operations, and customer experience.

Holds **two Master's degrees** (Business Analytics + Accounting) — combining analytical strength with deep financial knowledge.

EXPERIENCE

Business Analyst	02/2022 - Present
M&T Bank	Remote
- Lead analysis for digital banking, credit operations, and customer experience initiatives, improving process efficiency by 32% through automation and workflow redesign. - Drive requirements gathering across product, operations, compliance, and technology teams; build BRDs, FRDs, user stories, acceptance criteria, and process maps for multi-system enhancements. - Develop SQL queries and analytical reports to identify defects, performance issues, and trends across lending, payments, and servicing platforms. - Conduct gap analysis, root cause analysis, and impact assessments, reducing change-related rework by 28%. - Facilitate UAT planning, test case writing, defect triage, and sign-off, improving release quality and reducing production issues by 22%. - Build dashboards and KPI trackers for leadership, increasing reporting visibility and data accuracy by 30%. - Partner with engineering teams to support API integrations, system upgrades, and new feature rollouts. - Provide data-driven business insights supporting risk, compliance, and operational decision-making.	
Business Analyst	03/2017 - 12/2021
Synchrony Financial	Kettering, Ohio
- Supported large-scale digital and operational transformations across credit card servicing, fraud, payment operations, and customer management. - Improved business workflows by 40% using process mapping, automation proposals, and data-backed recommendations. - Translated operational issues into well-defined business and functional requirements, reducing requirement gaps by 35%. - Built analytical reports using SQL, Excel, and BI tools to support financial modeling, operational insights, and portfolio reporting. - Performed data validation, reconciliations, and compliance reviews, strengthening data integrity and reporting accuracy by 25%. - Collaborated with engineering, PMO, risk, compliance, and customer operations teams to deliver multi-department solutions. - Led UAT efforts and defect management, cutting production defects by 20%. - Developed dashboards for leadership highlighting trends in customer behavior, operational metrics, and portfolio performance.
